Percentage to our population, slightly over 14 in 1000.

INTOXICATING LIQUORS.

Eight licenses, 1st and 4th classes, under Chapter 100. Public Statutes, were issued during the year. See Selectmen's report.

Six licenses, 6th class, (Druggist) were also issued.

The fees for the ordinary license were increased somewhat and the resulting income was correspondingly larger, as follows:

7 Licenses, 1st and 4th classes (Victualler) at \$1500 each	\$10,500 00
1 License, 1st and 4th classes (Innholder) at \$1700	1,700 00
6 Licenses, 6th class (Druggist) at \$1 each	6 00
	<hr/>
	\$12,206 00
One-fourth of amount goes to the Commonwealth	3,051 50
	<hr/>
Net income to the town of Natick	\$9,154 50

DOGS.

Whole number of Licenses issued (including one \$50 breeder's license and one \$25 breeder's license) to Dec. 1, 1900. 449. Males, 405; Females, 42.

Whole number same period previous year, 498. Males, 447; Females, 49; and 2 breeder's licenses.

Amount of money turned over to County Treasurer, \$1,005.20, which sum, less the necessary percentage retained by the County, will be refunded to the town.

Respectfully submitted,

JAMES McMANUS,

Town Clerk.

I have examined the financial account of the Town Clerk relating to Dog Licenses for year 1900-1901 and find the same correct.

FRANK ATKINSON,

Auditor.

SELECTMEN'S REPORT.

The Selectmen respectfully submit their report for the year ending Jan. 31, 1901:

ORGANIZED—March 15, 1900. Frank W. Shattuck, Chairman. F. Dana Muzzey, Clerk. Voted Frank Atkinson as Assistant Clerk.

APPOINTMENTS.

POLICE—Dennis T. Sweeney, Chief; Herman Godendorf, Charles Schneider, Patrick R. Slamin, Frank H. Bunker. George Nutt, Court Officer. Thirty-five Special Officers without pay.

DOG OFFICER—Edward W. Hunting.

ENGINEERS OF FIRE DEPARTMENT—Frank W. Manchester, Chief, Irving E. Brown, Frank P. Caswell, William G. Dodge, Clarence G. Jacques.

CATTLE INSPECTOR—John W. Robinson, M. D. V.

SEALER OF WEIGHES AND MEASURES—Charles H. Whitcomb.

TOWN COUNSEL—Henry C. Mulligan.

BURIAL OFFICER—Royal B. Wight.

DISBURSER OF SOLDIERS' AID—Seth J. Rollins.

REGISTRARS OF VOTERS—Forrest N. Adams, for three years; Patrick F. Hallinan, to serve temporarily during absence of William H. Sullivan.

COMMITTEE ON APPROPRIATIONS—Phares N. Sawin, W. B. Robinson, George C. Fairbanks, Frank W. Hawes, O. A. Felch, D. J. Murphy, James Downs, Henry C. Mulli-

gan, George W. Travis, Edward Clark, C. W. Johnson, Irving E. Glidden, A. J. Doon, W. E. Rollins, John J. Ahern, Gustavus Smith, William O. Cutler, W. B. Sprout, C. A. Pooke, F. O. Baston, and Board of Selectmen.

LICENSES.

LIQUOR—A. H. Berry & Co., 1st and 4th, Victuallers.
 William Hopf & Co., 1st and 4th, Victuallers.
 Thomas H. Gavin & Co., 1st and 4th, Victuallers.
 P. F. Doherty & Co., 1st and 4th, Victuallers.
 Michael J. Grady & Co., 1st and 4th, Victuallers.
 Burke & Co., 1st and 4th, Victuallers.
 M. H. O'Rourke & Co., 1st and 4th, Victuallers.
 D. D. Sheehan & Co., 1st and 4th, Innholders.
 Burke & Dolan, 6th class.
 James E. Cooper, 6th class.
 Louie E. Clark, 6th class.
 Charles W. Perry, 6th class.
 Daniels & Twitchell, 6th class.
 Milton C. Brigham, 6th class.

POOL—Fred E. Lamb, Robert G. Wentworth, A. Bailey & Co.,
 M. H. O'Rourke & Co., L. E. Gleason, D. D. Sheehan.

MORTGAGES AND LOANS—R. E. Farwell & Son, Frank L. Ferrin.

LUNCH CARTS—James J. Spruhen, George H. Brooks.

FOR SALE OF FIREWORKS — George W. Saunders, James E. Cooper, Louie E. Clark, Fiske & Co., Fairbanks & Son.

FRANCHISES—Granted to Holliston, Sherborn & Natick Street Railway Co. to run cars through South Main, Central, Washington streets to South avenue.

Granted to the Boston & Worcester Street Railway Co. an extension of six months' time in which to begin the construction of their road over Worcester street.

The petition of the Natick & Framingham St. Railway Co. for a franchise dismissed.

Granted to the South Middlesex St. Railway Co. per-

mission to construct a turnout, on the northerly side of track on Central street, West Natick, on the condition that the turnout on Mill street be removed.

Granted to the South Middlesex St. Railway Co. permission to connect their tracks with the new car barn on Union street on the following conditions:

1st. Said switches and curves shall be located under the direction of the Selectmen, and a competent engineer employed by said Selectmen, whose services shall be paid for by said Company.

2nd. Plans showing location of said curves and switches and the grade thereof shall be furnished by said engineer, to be kept on file in the office of the Selectmen.

3rd. Said company shall, for the purpose of widening Union street, acquire by purchase a strip of land, not less than fifteen feet in width adjacent to the northerly side of said Union street and extending from the corner formerly known as May's ledge easterly to land of said company, which strip of land, together with a triangular strip taken from the front of the lot now owned by said company fifteen feet in width at the westerly end, running to a point at the easterly end and at said Union street, shall be given by said company to the town of Natick and dedicated to the public use as a part of said Union street.

4th. Said company shall macadamize or concrete, as the Selectmen may require, that portion of said Union street now occupied by the curves and switches leading to the old car barn, and occupied by the curves and switches herein permitted to be laid, and shall at all times keep the same in repair, and shall keep in repair all that portion of said Union street occupied by said curves and said switches; and shall save said town harmless and indemnified against all loss or damage either to person or property for which said town may become liable at any time hereafter because of the want of repair of said portion of said Union street, or

which may arise by reason of the presence of said curves and switches on said street.

5th. Said company shall light at its own expense, said portion of said Union street in such a manner as the Selectmen may from time to time deem necessary for public safety and convenience.

6th. In the event that said town shall at any time lay drain pipes on any portion of Union street on the side not occupied by the tracks of said company, said company shall for the purpose of conducting the surface water from the side of the street occupied by its tracks to said drain pipes, lay and maintain at its own expense suitable cross drains in such places as the selectmen of said town shall determine necessary and proper.

7th. Before doing any act towards carrying out this order said company shall file a written acceptance thereof with the selectmen.

REMARKS.

At the beginning of the past year, the first matter of importance to come before the Board outside the routine town business, was the completion of the bridge over the Charles river, at South Natick. This work has been finished in accordance with the plans and accepted. We believe the structure, as completed, to be generally satisfactory, the expense being three or four thousand dollars less than it would have been had the original plans been carried out. We recommend in the near future the construction of a concrete sidewalk from the square in South Natick to Dover street.

* * * * *

In removing from Mill street the turn-out on the South Middlesex Street Railway, we think one great inconvenience to the driving public has been done away with. It is to be hoped that before long the switch on Pond Street, opposite Dell Park Cemetery, may also be removed.

* * * * *

We think it necessary for the town to take some action in regard to improving the condition of drains which conduct surface water. During the past summer the Board of Health ordered that the north arm of Pegan brook be opened up to ascertain, if possible, the causes of obstruction. The condition was found to be such, that it was voted to clean out the brook from Harvard street to North avenue, the cost of the same to be paid out of the miscellaneous fund. The culvert under North avenue is in bad condition, and ought to be re-laid during the coming season. We recommend that this culvert be lowered

two or three feet, and, if possible, a twenty-four (24) inch pipe laid the entire length of the brook, and covered.

* * * * *

After countless complaints, the residents on East Central street, in the vicinity of Union, threatened to sue the town unless some action were taken to dispose of the surface water in that locality.

Accordingly, with the assistance of the Superintendent of Streets, your Board secured a written permit from Charles H. Hoey to construct a drain from Central street to the brook, through his property, and it was voted to expend fifty dollars of the miscellaneous fund to help the Road Department in this work, which has been duly completed.

* * * * *

On the petition of the Natick & Framingham Street Railway Company, two largely attended hearings were given, which developed a great deal of opposition, both publicly and privately expressed. While it was generally thought that the proposed road would be a convenience to through travel, your Board did not consider it a public necessity or of any great benefit to the town of Natick. We already have one electric road to South Framingham, and during the coming season another will doubtless be built, as the Boston & Worcester Street Railway Company hold a franchise granting them the right to construct a road through Worcester street to Framingham Centre. To allow the Natick & Framingham Street Railway Company to build a road between the two, which are only about a mile apart, would, we believe, be a damage to both, especially to the South Middlesex,—a road that has complied with every request the Board has made of it, notwithstanding some of these requests have, during the past year, been rather severe. In dismissing this petition, we believe we did that which was for the best interests of the town of Natick.

In granting the franchise to the Holliston, Sherborn & Natick Street Railway Company, your Board did all in its power to have the road pass through Rockland street, knowing it would be a great convenience to the residents in Southville. But, after a long delay, this route was positively refused, so the Board decided to grant the one called for through South Main street, rather than to give up the road entirely.

F. W. SHATTUCK,	}	<i>Selectmen of Natick.</i>

HIGHWAY SURVEYOR'S REPORT.

I hereby submit my report for the year ending February 1st, 1901 :

The care and construction of the public highways is a subject of the greatest importance to ever community. As each year goes by, the importance of this branch of public service is becoming more fully realized and with the spread of the "Good Roads" movement the spirit of first-class road-making is paramount in every city, town and village. The disbursement of the appropriation for highways, therefore, becomes one which admits of one or two things—a careful, judicious expenditure to procure results which will be lasting, or it may be expended in a "hit or miss" manner, which yields but temporary results at its best, and is far from satisfying either the citizens, or the town, or the department to which this portion of the public funds has been entrusted.

Fully appreciating the responsibility of my position, I entered upon my duties last March, determined to do my utmost to subserve the best interests of the town in making every cent expended in my department produce good results, and it has been my effort to do justice to the town, to the voter, and to my department. It was my opinion that the grades established on many of our streets were too high. To remedy this, I purchased a modern road scraper and a land plow, and these have been used during the year to good advantage. In the resurfacing and construction of highways, I procured a street sprinkler. It is a matter of common knowledge that watering and rolling the material used hardens and sets the roadway and at the same time does away with the discomfort of dust and dirt

to the traveller over the finished work. Streets on which this was done are firmer today and will last longer than if this had not been done. Not wishing to assume the responsibility of purchasing the sprinkler myself, I made an agreement to take the cart, subject to the approval of the town at the next annual March meeting, they to have the privilege of purchasing same for the sum of \$225.00 with interest, if not purchased the town to pay \$75 for its use last season.

I have saved this money from my appropriation and have turned it into the treasury as money unexpended. I strongly recommend the purchase of this sprinkler by the town for the use of the road department.

During the summer months, having in mind the convenience of all our citizens and also being aware of the vast number of people travelling by electric cars, walking from one electric road to another, wishing that good opinions of people of other communities might be obtained for our town, I purchased a patrol cart, at a slight expense, and had all crosswalks carefully swept and streets cleaned of refuse early Sunday mornings. This cost but \$52.81, and I am convinced it was money well expended.

The matter of bridge repairs being one which was annually increasing I conceived the idea of concreting the roadways of the bridges. Having consulted with the bridge builders and the engineers of the B. & A. R. R., I received permission to concrete the bridge on North Main street over the B. & A. tracks. Permit me to say that the method of planking is a very expensive one, it being necessary under ordinary conditions to replank the above mentioned bridge every eighteen months. I obtained figures for the replanking which amounted to \$95.00. Being convinced of the superiority of concreting, I contracted with Andrew Allen of Wellesley to concrete the bridge at an expense of \$125.00, with a guarantee that not one cent would need to be expended by the town on said portion of bridge for ten years. The work is there and speaks for itself, and I am pleased to hereby submit the contract with Mr. Allen.

NATICK, MASS., JUNE 19, 1900.

This agreement between Andrew C. Allen, of Wellesley, Mass., and the town of Natick, through the highway surveyor, John A. Williams.

Witnesseth:—That the said Allen agrees to repair forthwith the westerly side of the roadway for teams of the Main street bridge, between the electric car track and the westerly inside guard of said bridge, the material of said repairs to be furnished by said Allen and to be of a composition known to himself, but something similar to concrete, and all labor on same to be furnished by him, the said Allen. He hereby agreeing to keep the said westerly side of said bridge, when put in order as above, in repair for ten (10) years from date, without any expense to said town of Natick; and, in case the said composition should turn out to be a failure, in the judgment of the Selectmen and Highway Surveyor of said Natick for the time being, any time within two (2) years from date, then the said Allen agrees to replank said portion of said bridge in a substantial manner, to the satisfaction of the Selectmen and the Highway Surveyor of Natick for the time being as aforesaid, at his own expense. And for the repairs or reconstruction aforesaid as mentioned in the first part of this agreement, said Allen is to receive from said Town of Natick the sum of one hundred and twenty-five (\$125.00) dollars.

[Signed:]

ANDREW ALLEN,
JOHN A. WILLIAMS,

Highway Surveyor of Natick, Mass.

The matter of surface water has long been one of much trouble in various parts of the town. I have constructed eight new basins, and repaired ten, other details of which appear in this report. I would recommend the coming year new ones to be located on Pitt street, South Main street, (foot of the hill,) Walnut street (junction of Bacon,) and two on Washington street. I would further recommend the replacing of modern

covers on all old basins as soon as practicable. I have also constructed three drains very much needed, at East Central street and Hanchett avenue corner; Main street, in front of Ahern's block and Jackson's court. I would strongly recommend the widening of North Main street in front of the residence of Mrs. Sweeney. This is, without doubt, the most dangerous place on our public highways. The town owns land enough to widen this place from ten to twelve feet on the east side, a bank wall being necessary. The tracks of the Natick & Cochituate Street Ry. Co. could be set over and leave the roadway in first-class condition. The expense of a bank wall would be \$100.00, and the filling could be done at but a slight cost. The bank walls in the town are in very bad condition, and very soon must be relaid in a great many places, particularly on Union street, between the Sweeney estate and the turnout of the South Middlesex Street Railway Co.

I wish to call the attention of the voters of the town to the condition of Waban street, between Concord and Pond streets. This portion of street is not a public way, and the elevation is such that the drainage should come down this street to Pond street. I believe that this street should be accepted by the town, so that this part of the community could receive proper drainage facilities, and the street and sidewalks be placed in proper condition.

In conclusion, I wish to extend the thanks of this department to Chas. H. Hoey, for the privilege of constructing a drain through his premises on East Central street to south arm of Pegan brook, and to Edmund M. Wood and Ira Bowker for gravel given gratuitously, to the South Middlesex Street Railway for concreting track at corner of Pond and South Main streets and at South Natick, to the Natick & Cochituate Street Railway Co. for paying portion of drain work at corner of Hanchett avenue and East Central street.

Respectfully submitted,

JOHN A. WILLIAMS,

Highway Surveyor.

REMARKS.

The annual inspection of the farm by the Board was on January 23rd and everything was found in a very satisfactory condition. The inventory of the personal property showed an increase of \$371.85 in the valuation, the total valuation being \$3,468.07

The efforts of Mr. and Mrs. Silas Gurney as warden and matron are highly commended. Their business-like management have resulted in a noticeable increase in the revenue of the farm and a decrease in the expenses.

Upon request of the Board of Paris Exposition managers for this state, photographs with a description of the almshouse with necessary statistics were prepared and sent, Natick being one of three places in this state selected for the purpose. We have recently been highly gratified in receiving official notice that the exhibit was awarded a diploma of a bronze medal, which would be forwarded at an early date.

Nearly one-third of the net amount expended this year was for insane, \$1,250.88 more than last year. The different asylums have been visited by members of the Board, and the inmates are well cared for. Thirty-five persons have been provided for during the whole or part of the year.

The expenditure for outside poor has largely increased. While we have made a saving in some items, the amount paid for groceries, provisions, and for hospital expenses has been much greater.

MILTON E. SMITH,	}	<i>Overseers of Poor.</i>
FRANCIS C. PERRY,		
PATRICK MAHAN,		

REPORT OF TOWN PHYSICIAN.

To the Overseers of the Poor:—

My thirteenth annual report for the year ending Jan. 31, 1901, which is herewith presented, suggests an amount of work largely in excess of any previous year.

House calls	- - - - -	363
Office calls	- - - - -	437
Calls at the Almshouse	- - - - -	67

The calls for dispensary services among the outside poor, has in all cases seemed imperatively necessary, while the contributing cause for all this is manifestly, in most cases, the little demand for labor. However careful and considerate we may be it is many times a delicate question to determine who are absolutely meritorious, and therefore have a right to demand the free services of the town. There has been among the inmates at the [Farm no severe or continued illness, yet the majority being classed among the infirm and aged, has called for frequent and careful ministration. However much we may have sought to do so, it has been simply impossible to materially lessen the drug expense at the Farm.

For the many kind considerations shown me during our official intercourse, accept my grateful thanks.

WILLIAM RICHARDS, M. D.,
Town Physician.

REPORT OF CHIEF OF POLICE.

To the Honorable Board of Selectmen :

GENTLEMEN:—In discharging my duties as Chief of Police, I beg leave to submit to your Honorable Board my second annual report, comprising as full a statement as practicable of the duties performed by the members of this department during the year just past. I shall likewise venture to add such suggestions and recommendations as may seem reasonable and necessary.

The following table shows the number of arrests during each month, the total during the year, the sex, whether native or foreign born, residents or non-residents, adults or minors:

ARRESTS BY POLICE FOR THE YEAR.

	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	TOTAL
TOTAL	23	28	34	56	53	59	51	38	30	60	46	36	514
Males	22	28	34	54	53	57	50	38	30	60	45	36	507
Females	1	0	0	2	0	2	1	0	0	0	1	0	7
Native born	11	17	23	35	26	42	30	22	23	44	28	20	319
Foreign born	13	11	11	21	27	17	21	16	7	16	18	16	195
Residents	8	13	21	38	26	25	30	14	18	23	14	18	248
Non-Residents	16	15	13	18	27	34	21	24	12	37	32	18	266
Adults	23	28	31	54	53	55	41	37	28	57	46	36	489
Minors	0	0	3	2	0	4	10	1	2	3	0	0	25

The following is a list of the different offenses for which arrests were made and the number of arrests for each offense:—

	NO.
Assault and battery	27
Assault with intent to commit rape	1
By-Laws	4
Bathing in lake	1
Bastardy	1
Breaking, entering and larceny	6
Boarding house beat	1
Contempt of court	6
Committing common nuisance	1
Disturbing peace	25
Drunkenness	408
Destroying shade tree	1
Disturbance in public conveyance	1
Fast driving	1
Fast bicycle riding	4
Idle and disorderly	2
Keeping registered cans to be used	1
Larceny	2
Liquor nuisance	3
Peddling with short weight	1
Stubborn child	1
Using profane and indecent language	1
Vagrancy	10
Keeping an unlicensed dog	5
Total	514

Seven juveniles were arrested for petty offenses, principally curfew law violation.

The miscellaneous duties performed by the Police Department during the past year are as follows:—

	NO.
Buildings found opened and secured	53
Defective sidewalks reported	8
Defective streets reported	4
Fire alarms given	5
Fires extinguished without alarm	2
Goods found exposed and restored (estimated value)	\$206 00
Lost children restored	4
Lights hung in dangerous places	5
Strayed teams taken care of	4
Bicycles recovered and returned to owners	20

REMARKS.

In my judgment the strength of the Police Department is altogether too small, there being only five (5) officers to protect a town with over 9,000 inhabitants. There should be one officer to every 1,000 population.

I suggest that the town appropriate \$53,000.

One, if not two more officers, at least, should be appointed, so that the people living on the outskirts of the town could have a little protection.

I site the following table to show the strength of the Police Department in other cities and towns, the pay for officers per day, the number of officers, the number of arrests made and the appropriation for the maintenance of said Department:

SALARIES OF POLICE.

Names of Cities or Towns.	Population.	No. of Police.	Sal. per day.	No. of arrests, 1900.	Appropriation
Marboro	14,000	11	\$2.50	407	\$11,658.00
Melrose	12,300	10	2.50	150	11,500.00
Watertown	10,000	10	2.50	233	8,800.00
Woburn	14,500	15	2.35	658	12,000.00
Clinton	13,500	19	2.50	923	7,800.00
Canton	4,600	3	2.50	203	3,000.00
Wellesley	5,072	4	2.50	75	3,750.00
Framingham	11,302	8	2.50	235	7,000.00
Milton	7,000	18	2.50	102	19,500.00
Natick	9,480	5	2.00	514	4,000.00

You see from the above table that this town has, in proportion to its population, fewer officers, who are payed less per day, who have made more arrests and have less money to maintain the Department than any of the cities or town above mentioned. Still with all this, some people wonder why the Department has not done more. I leave the citizens to read and judge for themselves.

I repeat the statement I made a year ago, that in the matter of illegal liquor selling, Natick will compare favorably with any other license town in the Commonwealth.

There have been eight search warrants issued for liquor and in four places liquors were found, four warrants were returned as the evidence obtained did not warrant service.

The organization of the Police Department is as follows:—

Dennis T. Sweeny	Chief
Frank H. Bunker	Patrolman
Charles Schneider	Patrolman
Herman Godendorf	Patrolman
Patrick R. Slamin	Patrolman
Henry A. Pray	Reserve Officer
James J. Slamin	Reserve Officer

In conclusion, I wish to thank the Honorable Board of Selectmen and all citizens for their interest in the welfare of this department, also Trial Justice Mulligan for valuable advice pertaining to police affairs. The officers of this department are deserving of commendation for the cheerful manner in which they have performed their duty.

Respectfully submitted,

DENNIS T. SWEENY,

Chief of Police

Sinking Fund Commissioners

ENGINEERS' REPORT OF FIRE DEPARTMENT.

To the Citizens of Natick:

The annual report of the Board of Engineers for the year ending Feb. 1, 1901, is herewith respectfully submitted.

Up to date Feb. 1, 1901, the department responded to the following number of alarms:—

Total number of alarms	59
Bell alarms	28
Verbal still alarms	24
Telephone still alarms	2
Automatic alarms	5

There were also nine fires for which no alarm was given, entailing a loss on buildings of \$624; on contents \$404.64.

STATIONS.

There are three stations under our control, all of which are in first-class condition.

APPARATUS.

The apparatus at present consists of two steam fire engines, four hose wagons, two four-wheeled hose reels, one two-wheeled jumper, one two-horse ladder truck, one hand truck carrying sixty-five foot ladder, one supply wagon, also one two-horse ladder truck out of commission, which has been advertised for sale according to vote of town.

HORSES.

There are ten horses connected with this department, three of which have outlived their usefulness as fire horses and will have to be replaced very soon.

HOSE.

Under the special appropriation, 1,850 feet of new hose was purchased, making 11,187 feet now in use, divided as follows:—

The 400 feet of condemned hose credited to Engine House 2, in last report has been sold for \$10.50.

Department Headquarters.

1,787 feet new hose.
2,300 " fair and indifferent.
650 " condemned.

Engine House No. 2.

500 feet new hose.
800 " fair condition.
800 " indifferent.

Hose House No. 4.

300 feet new hose.
1,050 " fair.
400 " indifferent.

Hose House No. 5.

850 feet, indifferent.

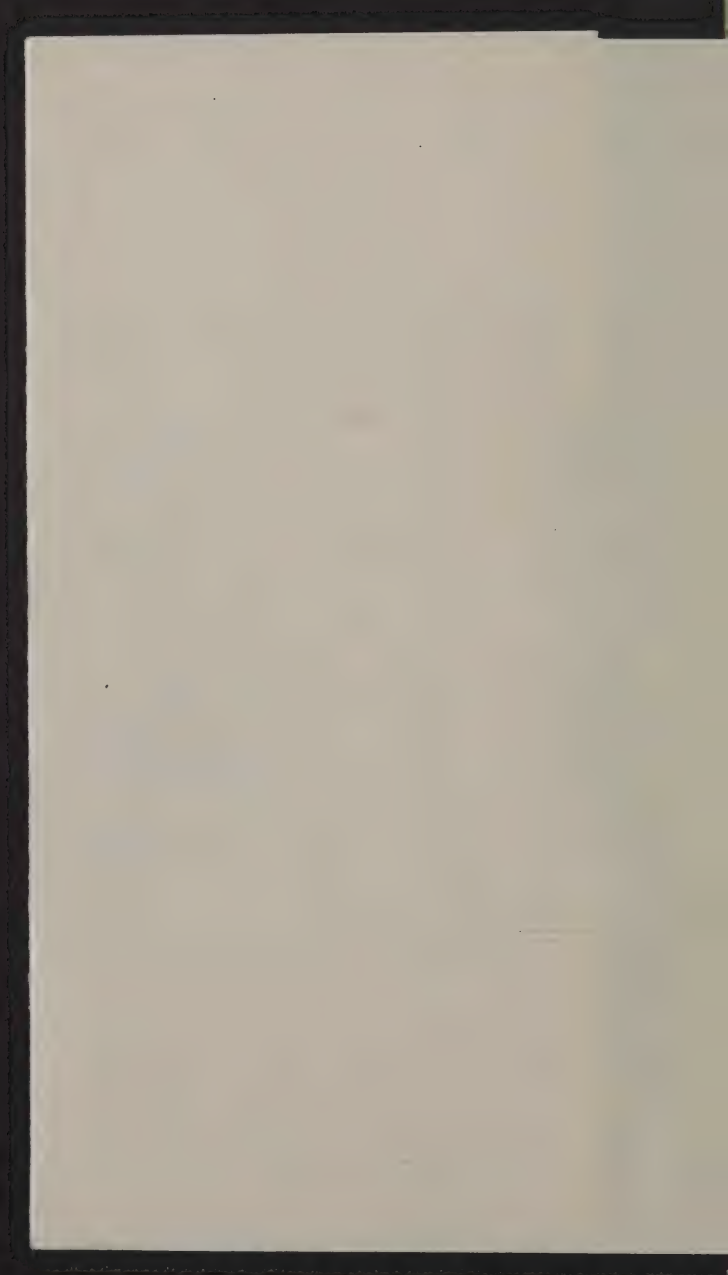

Hose House No. 6.

750 feet indifferent.

THE ALARM TELEGRAPH.

Five-circuit repeater	1
Five-point switch board	1
Morse telegraph key	1
Western ammeter	1
Inking registers	2
Tower bell strikers	2
Whistle machine	1
Twelve-inch gongs, mechanical	2
Six-inch gongs, mechanical	3
Four-inch gongs, direct acting	7
Visual indicator	1
Signal stations	24
Miles of wire	36
Cells of battery	145

The fire alarm system is in good order. The wires formerly on the property of the B. & A. R. R. have been removed beyond

all controversy. New crossarms have been placed on the loop from South Natick to Little South, and new poles set at various points, to strengthen the system as far as our appropriation would allow. The North Natick loop has been partially rebuilt, the remainder being left over for this year. There were two partial disablements of the system, one in July, when four out of our five circuits were burned out by lighting, rendering them inoperative for a brief period, and one in September, the box which surrounds the whistle pipe becoming ignited, resulting in the whistle being out of order for two days. There has been a stand still in the matter of new signal stations for four years, and as there remain many points to be protected we hope there will be a special appropriation for at least two boxes to be put in this year.

REMARKS.

In rendering our report for the year 1900-1901, we wish to thank the citizens for their confidence in us in granting us every thing we recommended with but one or two exceptions. The Central station has been repaired, new floors laid, walls painted and varnished and numerous improvements made which were really necessary. The result is a fire station equal to any in the state. No. 2 station also has been repaired under the direction of Engineer Caswell. An inspection of these two stations by the citizens is desired and we feel sure that the improved condition will convince you that the special appropriation for this purpose has been wisely expended. \$1,050 was appropriated for new hose to be let out to lowest reliable bidder. All the different firms sent in samples and prices and the contract was awarded to the Eureka Fire Hose Company, New York City, they agreeing to furnish us 1,850 feet for \$1,000. The remaining fifty dollars was expended for suction hose.

It is our duty to publicly thank the members of our fire department for their promptness, perfect discipline and harmony which is manifest at all times. Your ability as fire fighters has not only been recognized by the local press and cards of thanks

by private citizens, but you have been paid the highest compliments from insurance adjusters and the state fire marshal.

The police also deserve our sincere thanks for their assistance.

The new truck was placed in commission Oct. 20, dedicated Oct. 23. Natick can well feel proud of this piece of apparatus as it is the verdict of all those that have seen it, both natives and strangers, that for service, beauty and durability it can't be beat. The old truck has been advertised for sale but as yet we have had no applications for it. Again we feel compelled to mention the careless custom of working all the horses long distances from the station. Every year the chances taken are greater and the expense to the department is larger. We have been very fortunate in procuring horses from the livery stables this year when needed, but there has been times when the horses have all been engaged. Had there been an alarm then we would be helpless.

We would recommend that the superintendent of streets consult with the engineers and agree upon some plan to lessen this danger.

RECOMMENDATION.

We would recommend that hydrants be placed at the following named locations, a copy of which has been presented to the board of water commissioners:

Pleasant street, Felchville, near Thomas Dealey's.

Lake street, near F. H. Strattard's.

Shattuck street, near John H. Pratt's.

Highland avenue, near W. H. Gurney's.

Clarendon street, near Felch's block.

West Central street, near Cemetery street.

Pond street, near Hill's ice house.

Oakland street, near bridge.

Concord street, near John Engel's.

Walcott street, near James Naphen's.

Grant street, near Henry Burns'.

Avon street, near E. Mathieus'.

Union street, South Natick, opposite Broad avenue.
Pleasant street, South Natick, near Indian lane.

SPECIAL APPROPRIATION FOR NEW HOSE.

Appropriation	\$1,050 50
From Order No. 45. Eureka Fire Hose Co. \$1,000 00	
“ “ “ 170. Cornelius Callahan	
Co.	50 00
Total expended	\$1,050 00

SPECIAL APPROPRIATION FOR LADDER TRUCK.

Appropriation	\$1,000 00
From Order No. 139. Abbott Downing Co. \$1,000 00	
Total expended	\$1,000 00

Your Committee, chosen to purchase a ladder truck, organized with Edward Clark, chairman ; Engineer Jacques, secretary.

After visiting all the fire stations of cities and towns in this vicinity, it was unanimously decided to give the contract to the Abbott Downing Co.

It was built on specifications drawn up by your committee, and to cost one thousand dollars (\$1,000.)

Was finished and accepted Oct. 19, 1900.

FRANK ATKINSON, *Auditor.*

ANNUAL TOWN MEETING.

March 4, A. D. 1901.

WARRANT.

COMMONWEALTH OF MASSACHUSETTS.

MIDDLESEX, SS:

To any Constable of the Town of Natick in said County,
Greeting:

In the name of the Commonwealth of Massachusetts you are hereby required to notify the qualified voters of said Town of Natick to meet in the Town Hall, Clark's Block, Natick,

MONDAY, MARCH 4, A. D., 1901.

at 6 o'clock A. M., then and there to act on the following articles:—

ARTICLE 1. To choose by ballot a Moderator to preside in said meeting.

ART. 2. To choose by the Australian system of balloting the following officers: One Town Clerk, one Town Treasurer, three Selectmen, one auditor, one Highway Surveyor, one Tree Warden and Six Constables, all for one year; also Two Assessors, of Taxes, one for three years and one two years, one Overseer of the Poor, one Water Commissioner, one Sewer Commissioner, one Sinking Fund Commissioner, two Members of the School Com-

mittee, and one Member of the Board of Health, all for three years ; also one Trustee of the Leonard Morse Hospital for seven years ; also to answer by the Australian system of balloting the following question : " Shall licenses for the sale of intoxicating liquors be granted in this town ? "

For the purposes specified in this article the poll will open immediately after the election of a Moderator and will remain open continuously until 4.30 o'clock P. M., when it may be closed, unless the meeting then assembled shall otherwise determine.

ART. 3. To see how much money the town will grant for interest, existing liabilities and sinking funds ; for roads, bridges and culverts ; for operating the stone crusher ; for sidewalks and crosswalks ; for assisting and maintaining the poor ; for schools, school supplies and furniture, repairing school houses and evening schools ; for the fire department ; for police and watchmen ; for support of the Morse Institute ; for collection and abatement of taxes ; for paying town officers ; for military aid and assisting poor soldiers, sailors and their families ; for decorating soldiers' graves ; for lighting streets and public places ; for maintenance of the sewer system ; for repairing and improving town property ; for winding and repairing town clocks ; for expenses of the tree warden ; for rent of town hall ; for rent of armory of Co. L, and office room for town officers ; for suppressing the illegal sale of intoxicating liquors ; for necessary town uses.

ART. 4. To see if the town will authorize its Treasurer, with the approval of the Selectmen, to borrow money temporarily, in anticipation of the taxes for the municipal year 1901-1902, said money to be payable out of the taxes of said year—and if so, in what manner and how much ?

ART. 5. To see how the town will have its taxes for the year 1901 collected, and choose a Collector of Taxes and fix his compensation.

ART. 6. To see if the town will accept the List of Jurors as revised by the Selectmen.

ART. 7. To see what action the town will take to procure a hall for town meetings and other town purposes during the coming year, grant money to pay for same, or otherwise act thereon.

ART. 8. To hear and act upon the report of the committee of ten appointed at the last annual meeting to consider the matter of the erection of a school house to take the place of the Felchville and Bacon school houses, and also to consider the matter of building a new school house at West Natick ; to see what sum of money, if any, the town will appropriate to carry out the recommendations of said committee, and, if the town shall vote to build one or more school houses, to appropriate money therefor, and borrow the same under the provisions of Chap. 62 of the Acts of 1900, or take any other action thereon.

ART. 9. To see if the town will vote to build a new school house north of the Boston & Albany railroad, appropriate money and appoint a committee for that purpose, and borrow the amount so appropriated under the provisions of Chap. 62 of the Acts of 1900, or take any other action relative thereto.

ART. 10. To see if the town will vote to build a new school house at West Natick, appropriate money and appoint a committee for that purpose, and borrow the amount so appropriated under the provisions of Chap. 62 of the Acts of 1900, or take any other action relative thereto.

ART. 11 To see if the town will vote to remodel the Pond street school house and provide the same with a system of heating and ventilation and sanitary plumbing, and appropriate money therefor ; and authorize the Treasurer to borrow the amount so appropriated, or take any other action relative thereto.

ART. 12. To see what sum of money the town will appropriate for the improvement and repair of any of its school buildings, and authorize the Treasurer to borrow the same, or take any other action relative thereto.

ART. 13. To see if the town will vote to authorize the Treasurer to pay on orders properly drawn and approved such

sums as may be due to regular town employes for services rendered between Feb. 1st and the annual town meeting, such sums to be deducted from the appropriations of current year and to authorize the Treasurer to borrow money for said purpose.

ART. 14. To see what sum of money, if any, the town will appropriate for connecting estates with the public sewer; and to see if the town will vote to issue its bonds or notes and use the proceeds thereof to pay for making such connections, under the provision of Chapter 319 of the Acts of 1899, as amended by Chapter 112, Acts of 1900.

ART. 15. To see if the town will authorize the Sewer Commissioners to extend the sewerage system in certain cases where in their judgment it is for the interest of the town so to do, and authorize the Treasurer to borrow not exceeding \$2,000 for that purpose; or determine in what other manner the expense of the same shall be met.

ART. 16. To see if the town will authorize the purchase of a new stone crusher, or the repair of the old one, and appropriate money for either of said purposes.

ART. 17. To see what sum of money, if any, the town will appropriate for the construction of the section of State Highway on East Central Street, which the town has heretofore voted to construct, and to see if the town will borrow any sum so appropriated for that purpose; or take any other action relative to the construction of said section of State Highway.

ART. 18. To see what action, if any, the town will take relative to the construction of a drain for the surface water of Union Street at South Natick, and grant money for that purpose.

ART. 19. To see what action, if any, the town will take in regard to the order of the County Commissioners for widening and straightening Pleasant Street at South Natick.

ART. 20. To see what sum of money, if any, the town will appropriate for the settlement of Speen Street land damages.

ART. 21. To see if the town will vote to settle the claim

of James M. Forbush & Co. for insurance premium paid by them in behalf of the town to the Guarantor's Liability Indemnity Company in 1897 ; and appropriate money for that purpose.

ART. 22. To see if the town will vote to accept Shattuck Street extension as laid out and filed by the Selectmen.

ART. 23. To see if the town will authorize the purchase of a sprinkling cart, and appropriate a sum not exceeding \$250 for that purpose.

ART. 24. To see if the town will refund to John L. Smith the amount of the taxes erroneously assessed and collected from said Smith on a parcel of land never owned by him.

ART. 25. To see if the town will vote to pay for Concert Hall one night in this year, and grant the fire department the free use of said hall for that night.

ART. 26. To see if the town will authorize the Treasurer to borrow money, temporarily, to pay damages caused by the separation of grade crossings in Natick, in anticipation of money to be furnished for that purpose by the Commonwealth.

ART. 27. To see if the town will authorize the Water Commissioners to lay pipes in certain cases where, in their judgment, it is for the interest of the town so to do, and authorize the Treasurer to borrow not exceeding \$2,000 for that purpose.

ART. 28. To see if the town will vote to furnish coal for the three independent hose houses, and appropriate a sum not exceeding \$35 to pay for same.

ART. 29. To see if the town will vote to accept Hillside Road as laid out and filed by the Selectmen.

ART. 30. To see if the town will vote to place one electric light on Auburn Street, South Natick.

ART. 31. To see if the town will vote to place one incandescent light on Highland Street near the Walnut Hill School.

ART. 32. To see if the town will vote to place one incandescent light at the junction of Harvard and Tibbets Streets.

ART. 33. To see if the town will vote to place five incan-

descent lights on Rockland Street, between Farwell and Everett Streets.

ART. 34. To see if the town will cause the south arm of Pegan Brook to be cleaned, and appropriate money to pay for same.

ART. 35. To see what sums of money the town will borrow, under the provisions of Chapter 82 of the Acts of 1899, for the purpose of meeting its proportion of the damages and expenses incurred in the abolition of grade crossings.

ART. 36. To see if the town will vote to purchase a new horse for the fire department, and appropriate \$250 for the same, or otherwise act thereon.

ART. 37. To see if the town will vote to purchase two fire alarm boxes as recommended by the engineers, and appropriate \$300 for the same.

ART. 38. To see what action the town will take to improve the drain leading from Boston & Albany freight yard to Washington Avenue, appropriate money for the same, or otherwise act thereon.

ART. 39. To see if the town will accept Waban Street from Pond Street to Concord Street, as laid out and filed by the Selectmen, or otherwise act thereon.

ART. 40. To see if the town will adopt the provisions of Chapter 186 of the Acts of 1895, relative to the watering of streets, appropriate money for watering its public streets, or any portion thereof, and authorize its Board of Assessors to assess upon the estates abutting on the streets or portions thereof so watered the whole or any portion of the cost of such watering.

ART. 41. To see if the town will vote to water the streets during the coming year, work to be done under the direction of Highway Surveyor, appropriate money to pay for same, or otherwise act thereon.

ART. 42. To see if the town will grant to George W. Hurd of Boston, his heirs and assigns, permission to use for burial purposes a certain tract of land in Natick now owned by said

Hurd, containing fifty (50) acres, more or less, situated on the easterly side of Oak Street and northerly side of Worcester Street, and known as the Hosley Farm; and being the premises described in a deed to said Hurd recorded with Middlesex South District Deeds, Libro 2593, Folio 499.

ART 43. To act on the reports of the various town officers as printed, and to hear and act on the reports of all committees chosen on town affairs, and to choose all necessary committees for the ensuing year. Also to choose fence viewers and field drivers.

And you are directed to serve this warrant by posting attested copies thereof at each of the post-offices in said Natick, and at the following public places in said town, to wit: Selectmen's room; street entrance to town hall, Natick; engine house, South Natick; hose 4 house, Felchville; and at or near Felch Bros. factory, North Natick, seven days at least before said March 4, 1901. Also by causing an attested copy of said warrant to be published once in the newspaper called the "Natick Bulletin," said publication to be two days at least before the day appointed for said meeting.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the Town Clerk, at or before the time appointed for holding said meeting.

Given under our hands this nineteenth day of February, A. D., 1901.

FRANK W. SHATTUCK,	}	<i>Selectmen of Natick.</i>

ANNUAL REPORT

OF THE

Board of Sewer Commissioners

OF THE

TOWN OF NATICK

FOR THE

YEAR ENDING JANUARY 31, 1901.

NATICK, MASS.,
PRESS OF NATICK BULLETIN.
1901.

TOWN OF NATICK, MASS.,

SEWER DEPARTMENT, 1900.

SEWER COMMISSIONERS,

CRANSTON HOWE.

FRANCIS BIGELOW.

JOHN M. FISKE.

SUPERINTENDENT,

PATRICK E. PETTEE.

REPORT OF SEWERAGE COMMISSIONERS

To the Inhabitants of the Town of Natick :

The Commissioners beg leave to submit their fourth annual report.

COST OF CONSTRUCTION.

Total cost to town to Feb. 1, 1901	\$249,524 57
Rec'd from City of Boston for change of plans	18,000 00

Grand total cost	\$267,524 57
----------------------------	--------------

For a detailed account of the receipts and expenditures for the year, we refer you to the report of the Superintendent.

RENTALS.

The receipts from the rentals increase very slowly each year. The department was run by the rentals alone during the past year, as no appropriation for maintenance was asked. There are no outstanding bills against the department, all bills are paid, leaving a small balance for the sinking fund. Abutters along the line should connect as fast as possible and become users, otherwise it will take many years before any considerable sum of money from the rentals can be paid into the sinking fund.

EXTFNSIONS.

We recommend that the sewer be extended through the following streets the coming year: Grant street, Floral avenue

from Pearl to Western avenue, Western avenue to Pond street,
Pond street from Pitt to Forest avenue, High street from Pond
to W. Central streets.

CRANSTON HOWE,
FRANCIS BIGELOW,
JOHN M. FISKE,

Sewerage Commissioners.

REPORT OF SUPERINTENDENT OF SEWERS.

To the Sewerage Commissioners of Natick:—

GENTLEMEN:—The fifth annual report concerning the Natick sewerage system during the year ending Jan. 31, 1901, is respectfully submitted.

APPROPRIATIONS.

For the extension of the sewer, the sum of one thousand and five dollars and eight cents, (\$1,005.08) being the balance in the hands of the Treasurer, and the further sum of three thousand dollars, (\$3,000.00) to be borrowed, total four thousand and five dollars and eight cents (\$4,005.08). This amount to be expended by the Commissioners, where in their judgment it is for the interest of the town so to do.

CONSTRUCTION.

Work on Washington street extension commenced May 17. Clay and hard pan were encountered, very wet. Four Y's and 162 feet of 8-inch pipe were laid and one manhole was built. Cost per foot, 61 cents. Total cost, \$106.67.

Work on Highland street begun July 23 and was finished August 7. Dry clay and hard pan with very large boulders were found. Although the work on this street was very hard, owing to the nature of the soil, by examining the cost, depth, etc., and comparing them with former reports of similar streets, a very favorable comparison can be made. Twenty Y's and 996 feet of 8-inch pipe were laid, 3 manholes and one stand pipe were built. Total cost per foot 90 cents. Total cost, \$966.50.

Charles street was opened September 4. Gravel, clay, hard pan and some rock were found. Eight Y's and 350 feet of 8-inch pipe were laid and 2 manholes were built. Total cost per foot 70 cents. Total cost \$259.29.

Work began on Kinsman place Nov. 9. Clay and gravel were found. Four Y's and 196 feet of 8-inch pipe were laid. Total cost per foot 56 cents. Total cost \$113.81.

Shattuck street was opened November 13. Clay, hard pan, very wet, and boulders were found. Five Y's and 266 feet of 8-inch pipe were laid, and one manhole was built. Total cost per foot 84 cents. Total cost \$230.81.

Work on filter bed began on October 8 and was finished October 30. This bed was partly built in 1899, but was not finished on account of lack of funds. It would have been economy to have finished it at that time, as much of the work had to be gone over again this year. However, it is well constructed and works very well. Two hundred and sixty-seven feet of 10-inch pipe were laid and there were two manholes built. Six hundred and forty feet of 3-inch laterals were laid, which will assist the bed very materially.

Expended on bed in 1899	\$445 41
" " " " 1900	376 28
Total	<u>\$821 69</u>

Water service was laid to pumping station Dec 8, at a total cost of \$40.73.

Number of miles of pipe laid from 8-inch to 30-inches, including brick sewer, to Jan. 1, 1901, 9 miles, 573 feet.

HOUSE CONNECTIONS.

Work in this department began in April and closed in December. There were 89 connections made during the year at a total cost of \$1,714.57.

The total number of connections made at the close of 1900 were 435, of which number 402 are using the sewer, 270 having metered service and 132 pay by fixture rate. The total income

anticipated from these sources ending Dec. 31, 1900, is \$3,400.00, subject to abatements, etc.

FLUSHING.

The system was inspected and thoroughly flushed in April, July and November, and was found to be in an excellent sanitary condition.

FILTER BEDS.

The Overseers of Poor Department again utilized the beds for the cultivation of corn. We have at present seven beds, all in good working order. During eight months of the year the beds can easily take care of all the sewage that flows on them, but the other four months, February, March, April and May, being the wet season, all the beds are taxed to the utmost, as a vast amount of water enters the pipes through defective joints and manholes. During a season of very cold weather, no doubt there are many faucets left open to keep the water from freezing, thus increasing the flow in the pipes.

For perhaps two years more, the seven beds will be sufficient to handle the flow, the necessity of the construction of more beds to be determined by the increase of the number of house connections along the line.

PUMPING STATION.

Our plant at the present time is in an excellent condition. As I stated in my report of last year, the only serious question which confronted the department in reference to the station, was the lack of water for condensing purposes. The license procured from the Metropolitan Water Board last year for the privilege of drawing water from Cochituate meadow, was greatly changed this year, inasmuch as it was made obligatory on our part to put in a "surface condenser," so that the oil would be

thoroughly eliminated before the water would be returned to the pond. To put in this condenser, lay a line of pipe, and build a well thirty feet from the shore, subject to the approval of the Water Board, would cost about \$800.00. On account of the great expense this scheme was abandoned. As a last resort, the department turned to the Water Commissioners of this town with a request to extend the water pipes to our station so that we could always have a supply of clear water for condensing purposes.

After due consideration of the matter the Water Commissioners decided it would be for the best interests of the town to grant the request, and on the 7th day of December the town water was used in the station. In consideration of the large amount of water to be used and the consequent added expense to the Water Department, it was agreed that said department be recompensed to the amount of \$100.00 per annum, until such time as the town should otherwise decide. The advantage of having clear water for condensing purposes will be readily seen, from the fact that the cost of repairs to one pump the past year was \$81.90. If we were obliged to condense on sewage for the future the cost of repairs each year would average about \$75.00. Total expense at pumping station, \$2,311.94.

MAINTENANCE.

The outlay for maintenance during the past year was quite large, the coal item being largely responsible for this outlay. Ordinarily the coal expense amounts to about \$850.00 per year, but the past year the amount paid was \$1,166.06. In former years the coal was delivered when wanted, as the bin would not hold the full amount of the order, 200 tons, consequently it frequently happened that a bill for coal would be paid the beginning of a new fiscal year for coal that was used the latter part of the previous year. It so happened this year, and besides paying for that we have also paid in full for the 100 tons delivered at the station this fall, a supply that will last for many months. We have also paid \$50.00 to the Water Department

for six months' water rental at the station. Notwithstanding this unusual outlay, about \$350.00, we have paid every bill against the department and have turned over to the Treasurer a small balance.

EXPENDITURES FOR MAINTENANCE.

Work on filter beds	\$ 34 77
For flushing	110 85
At pumping station	2,311 94
Outside pumping station	1,336 70
Total	<u>\$3,794 26</u>

REPORT OF TRUSTEES OF MORSE INSTITUTE.

To the Citizens of Natick :—

The Trustees of the Morse Institute herewith respectfully submit their twenty-eighth annual report. The past year has been one of uninterrupted progress. Many popular and valuable works have been added to the library, particularly in the circulating department. As will be noticed in the Librarian's Report, 622 volumes have been added, 487 of which were new books purchased by the Trustees; 100 were given by friends, and the balance were old books rebound. Each year sees the Library made more and more an accessory to the public school curriculum. Students of private schools and higher institutions of learning find here a rich field for research and investigation. It is the aim of the Trustees, inasmuch as the income from invested funds will permit, to purchase such works as seem beyond the means of many students, but are of inestimable value in the general education of the people. The arrangement of the reading rooms on the first floor, and the use of the second floor solely for the circulating and reference libraries seem to meet the approval of their patrons, aside from the increased convenience to the clerical force employed.

By the will of Mrs. Stephen Hayes the Institute became a legatee to the amount of five thousand dollars. The Trustees take this opportunity to publicly recognize this munificent legacy, and to express their deep sense of gratitude for such a generous benefaction. More indissolubly than ever will the name of Morse be linked with that of the

Institute, and live in memorial union with our noble and beloved civic institution. This gift comes to the Institute at a most opportune time. Owing to the necessity of economizing in all departments of our municipal government, the Trustees have refrained from asking for an appropriation sufficient to pay the running expenses of the library and keeping the building in a satisfactorily good condition. Therefore we have been obliged to delay some repairs and make only such as were absolutely demanded. It is hoped that ere long a special appropriation of a few hundred dollars will be made by the town to make these needed improvements.

Through the wise beneficence of John O. Wilson, president of the Board of Trustees, who has been most intimately connected with the Institute since its establishment in 1863, a new and distinct department has been created under the name of "Young Peoples' Library." This library occupies the large east room on the first floor. This room for years has been used as a stowage for newspaper files, public documents, etc. It has been completely renovated and refurnished with tables, desks and chairs to meet the particular needs of such a department. Many new books, selected with care and discrimination, have been purchased and now adorn its shelves. The Trustees and Librarian take great pride in recommending to parents this exceptionally valuable and important adjunct to our public library.

Here can be found the choicest literature for the young; as only books of the highest character are offered to our youthful readers. Already people of maturer years have discovered how interesting and instructive are the volumes here to be found, and have become frequent visitors. Although designed primarily for the young, this department is open to all, irrespective of age. As a sequence to the establishment of a library of such well selected books, we can properly anticipate a more cultivated and discriminating taste among its patrons. They will learn to prefer a good

book to one unduly imaginative and emotional. This indispensable addition to our already popular library will strengthen the influence of the Institute as a moralizing agent, and stand a living monument to the unselfish devotion of its founder. We respectfully refer you to the reports of the Treasurer and Librarian for more complete information pertaining to their respective departments.

JOHN O. WILSON, President,

REPORT OF THE LIBRARIAN.

FOR THE YEAR ENDING JAN. 31, 1901.

To the Trustees of the Morse Institute Library:—

GENTLEMEN :

The following report shows the work of the library for the year.

The most important work accomplished outside the regular routine was the establishment of a young peoples' library made possible by the gift of Mr. John O. Wilson. Mr. Wilson has always manifested an unfailing interest in children in the public schools and elsewhere, and had realized the benefit of a special room separated from the regular library, with books and periodicals adapted to young people, where they might have free access to the books. The gift allowed one thousand dollars to be used for the furnishing and fitting up the room and to purchase such new books as were needed immediately. The best juvenile books in the library were taken to this department, eight hundred and thirty in number, and one hundred and fifty-four new volumes were purchased. Mrs. O. A. Cheney gave forty volumes for this room, making ten hundred and twenty-four volumes on the opening day to set before the children of Natick. The Melville Dewey decimal classification was used with Cutter author number. The children are allowed to go to the shelves and look over the books, read them in the library or have them charged to take home. There is a good supply of periodicals for children on the reading tables and every freedom possible is given the patrons. Miss Clara

Randall is attendant in the department and shows a marked adaptation for the work with children. It is always orderly and quiet and the daily crowded room is an interesting sight. The number of books taken out on cards the one month the room has been open was eight hundred and fifty-seven.

The library has received two generous gifts this year of five thousand dollars each. One by the will of the late Mrs. Stephen Hayes, the other by Mr. John O. Wilson.

The library aims to co-operate with the schools also with the literary clubs, and with all efforts for improvement. A great amount of our time is spent in aiding students. Patrons enjoy looking over new books and a good number of of such books are constantly out for examination on shelves near the desk. A separate shelf of books for children is always kept filled with the best juvenile literature and is found to be very popular. The large amount of solid reading chosen from this open shelf is surprising. The invariable good order among the children in the building is often remarked upon; seldom is it necessary to give a word of repression.

Several exhibitions of photographs from the Library Art Club have been enjoyed by a few. These exhibitions are advertised in the local papers and are well worth the effort of coming to the library to see. They should be interesting to the people untravelled as well as to renew old impressions in the minds of those who have been fortunate enough to have seen the subjects represented. The collection of fifty colored photographs of Japan were especially good. The Florentine pictures were enjoyed by a large number of visitors; these contained photographs of paintings by artists like Raphael, Rembrand, Titian, Vandyck, and many others. Another exhibition that deserves special mention was the one of Amsterdam and Holland.

The children's books were unavoidably out of circulation for two months during the time the books in the young peo-

ple's library were being catalogued. This caused a slight falling off in the circulation, besides inconvenience and disappointment.

The matter of rebinding books is getting to be important; this year it has cost the library \$98 05 for rebinding. This bill has always been paid from the library fund. When we consider the entire income is about \$700.00 yearly and nearly \$100.00 is used for rebinding it is to be regretted the town does not bear this expense.

The editors of the three local papers have continued to publish lists of new books, also any items of library interest; they also send their papers to the reading rooms and have offered an extra copy for binding at the end of the year.

I wish to thank the trustees for their assistance and encouragement in the work undertaken. The success of the year's work depended largely upon the members of the staff who have discharged their responsibilities cheerfully and faithfully.

Respectfully submitted,

NELLIE L. FOX,

Librarian.

REPORT OF THE SCHOOL COMMITTEE.

The School Committee present the following report for the year ending January 31, 1901.

At the close of the spring term, much to the regret of the Committee, Mr. Frank E. Parlin, after seven years of faithful and efficient service as Superintendent, tendered his resignation to accept the superintendency of the Quincy schools. We have in former reports called attention to the character of Mr. Parlin's work. It was the policy of the Committee during the entire term of his service to give him the widest latitude in the discharge of his official duties and to permit him, unhampered, to carry out his plans for the improvement of our schools. The result has fully justified the confidence reposed in him. He regarded his official duties as a sacred trust. In his management of our schools he displayed a progressive spirit, sound judgment and a conscientious and fearless devotion to the welfare of the children under his charge. As a result, our schools have steadily advanced and have attained a high standard of excellence.

From a large number of candidates whose qualifications were considered, Mr. Albert L. Barbour was unanimously elected to fill the vacancy caused by Mr. Parlin's resignation. Mr. Barbour came highly recommended, and with a record of successful experience both as a teacher and superintendent in Massachusetts schools, and has entered upon his work in an earnest and intelligent manner.

SCHOOL ACCOMMODATIONS.

In our last annual report we called attention to the inadequate and unsatisfactory school accommodations north of the Boston & Albany railroad, and unanimously recommended the

erection of an eight-room building to be located at a convenient point for the pupils of the Bacon, Cochituate and Felchville districts, and the abandonment of the present Bacon and Felchville buildings. We called attention to the fact that it would require an expenditure of several thousand dollars to put these buildings in proper repair, to furnish them with modern heating and ventilating apparatus meeting the State requirements, and to provide suitable exits and safe-guards against fire. It also appeared that even after this large expenditure these buildings would not afford the opportunity for advantageous classification and grading of the pupils that would be provided by a single eight-room building; neither would the repair of these old buildings give any relief from the present overcrowded conditions in the upper grades of the Wilson school, nor make any provision for the future growth of the town. The Committee caused articles to be inserted in the warrant for the last annual meeting to afford the town an opportunity to take action upon its recommendations for the building above referred to, and also for a new school house at West Natick. Both these matters were referred by vote of the meeting to a committee of ten to consider and report on the same at the next annual meeting.

REPAIRS.

At its last annual meeting the town appropriated six thousand dollars for the repair of school houses, and instructed the School Committee to expend the entire sum on school houses during the year.

This liberal appropriation has enabled the committee to do much needed work, which, owing to prevailing high rates of taxation, had been postponed during the past few years until longer delay would have been unwise. For a detailed statement of the expenditure of this appropriation, attention is called to the report of the Superintendent and to the itemized account appended thereto. Before expending this money, we considered the question of remodelling the Pond street school house, and providing a modern heating and ventilating apparatus and suit-

able sanitary appliances to meet the requirements of the State Inspector of School Buildings. It was found, however, that the cost of putting this building in a permanently satisfactory condition was such that the work could not be done without encroaching upon the funds needed for other essential repairs. We have obtained, however, plans, specifications, and estimates, which are at the disposal of the town whenever it is ready to appropriate the money for this much-needed improvement.

* * * * *

For the general condition of our schools we invite attention to the following report of the Superintendent, which is made a part of our report. The suggestions and recommendations therein contained receive the hearty approval of the committee.

School Committee

SUPERINTENDENT'S REPORT.

I herewith present my first annual report as Superintendent of Schools, which is the tenth in the series issued by the Superintendent of the Public Schools of Natick.

In previous reports the statistics of membership and attendance have covered the period from February 1st to the following February. To compile this report accurately has been both an awkward and a difficult matter owing to the fact that the pupils changed grades and teachers at the end of the summer term, and the records of their attendance were necessarily taken from two different registers. To overcome this difficulty and to establish a uniformity in the beginning and ending of the school year, the State Board of Education has determined that the school year hereafter shall begin on September 1st and end July 1st, and that statistics and reports cover this period of time.

The records of attendance given in this report are in compliance with that rule, and cover the year ending July 1st, 1900, although there have been added a few supplementary figures to show more clearly the present attendance in each room and grade. It will be observed that on the whole there is but little variation from the figures given in the last report. There have been slight decreases in certain instances, but these have in general been counterbalanced by increases in other places. At the Eliot school the enrollment became sufficiently small to allow the School Committee to dispense with the services of one teacher, while one additional teacher was required by the increased attendance at the high school.

In giving the financial statement of the school department for the present year, the different items have so far as necessary

been itemized. Expenditures for teachers, janitors, fuel, books, etc., of course require no explanation, but miscellaneous and repair accounts will be found with the necessary explanations after each item.

STATISTICS.

Population of Natick, census of 1900	9,400
--	-------

School Census.

Number of boys between the ages of 5 and 15	809
Number of girls between the ages of 5 and 15	768

Total	1,577
-----------------	-------

Number of boys between the ages of seven and fourteen	518
---	-----

Number of girls between the ages of seven and fourteen	618
--	-----

Total	1,136
-----------------	-------

Length of school year in high school	40 weeks
--	----------

Length of school year in eighth and ninth grades	38 weeks
--	----------

Length of school year in other grades	36 weeks
---	----------

Number of school buildings	12
--------------------------------------	----

Number of rooms occupied	48
------------------------------------	----

Number of rooms unoccupied	2
--------------------------------------	---

Number of sittings	2,250
------------------------------	-------

Number of teachers { regular 48 }	51
{ special 3 }	

Number of teachers who are college graduates	10
--	----

Number of teachers who have attended Normal school	29
--	----

Number of teachers who have graduated from Normal school	19
--	----

Number of pupils under 5 years of age	0
Number of pupils between 5 and 15 years of age	1,572
Number of pupils between 7 and 14 years of age	1,154
Number of pupils over 15 years of age	269

Attendance for the Year Ending July 1st, 1900.

	Average Membership.	Average Attendance.	Per Cent. of Attendance.
High School	255.07	243.84	95.59
Wilson	556.38	526.13	94.56
Eliot	240.85	231.21	96.00
Pond Street	175.40	165.90	94.51
Oak Grove	149.85	141.47	94.41
Felchville	105.13	98.91	94.09
Harvard	72.32	68.24	94.51
Bacon	88.44	81.29	91.92
Cochituate	27.27	25.90	93.60
Southville	22.99	20.16	91.50
West	19.56	17.91	91.56
North	27.02	25.91	95.92
Totals	1,740.28	1,646.87	94.63

The total enrollment in the schools or the whole number of pupils attending at any time during the year was 1,902, or 66 less than last year.

The average membership for the year was 1,740.28.

The average attendance was 1,646.87.

The number of visits made by parents and friends was 1,709.

The average cost per pupil for instruction, fuel and care of buildings based upon the average membership was 15.42.

The average cost per pupil in the average membership for all expenses exclusive of repairs and buildings was \$20.99. The average for the State, estimated in the same way was \$26.06, or \$5.07 more than for Natick.

The average cost per pupil in the average membership for all day school expenses was \$24.42. For the State, the same average was \$33.92 or \$9.50 more than for Natick.

School Buildings and Accommodations.

An examination of the foregoing statistics of attendance in the various buildings, while it will show the congested conditions of several rooms, will not show without explanation the inconveniences caused in other instances, and it may be pertinent for me to say a few words in making clear the present conditions.

The seventh grade children from the Harvard and Bacon schools have heretofore been sent to the Wilson building. Because of the increase in numbers in the seventh grade it has been impossible this year to accommodate the pupils from the Bacon school, and they have in consequence been sent to Felchville. The number from the Harvard school was enough of itself to overcrowd the seventh grade at the Wilson building, compelling some of the children living near the latter school to go either to Pond Street or Oak Grove for the needed room. The eighth grades at the Wilson school were also overcrowded, and as a partial remedy an eighth grade was established at the Oak Grove school. The large attendance at the Pond Street school is due to some extent to the increasing number of children coming each year from West Natick, where the school facilities are insufficient. There is no prospect of these conditions being relieved next year; in fact they will probably be more marked. For many years the Wilson school has provided school accommodations for all the pupils in the town of the

higher grammar grades aside from those in South Natick. For the past few years, although the total attendance and membership of the schools has not increased to a great degree, there has been a decided increase in the number of pupils in the upper grammar grades, and as a consequence the Wilson school is no longer able to meet the demands upon it, and its overflow has exhausted the resources of the Pond Street and Oak Grove schools as well. If this increase in attendance is to continue in these upper grades, and it is a matter of course to expect it will, some provision must be made for the pupils who come from the north side of the Boston & Albany railroad. The overcrowding which at present exists in several of the schools is distinctly injurious on account both of sanitary conditions and of the faulty classification of pupils. To what extent it is possible or profitable for the town to remodel one or two of its old buildings, it is not in my province to discuss. The last annual report stated clearly the needs and conditions of the schools, and I have endeavored to do the same in this report. I trust the matter will receive the careful consideration which its importance demands.

School Work.

In speaking of the general efficiency of the school work of Natick, I must make the acknowledgements which are so justly due my predecessor, for the excellent standards which I found prevailing upon my entrance to this office in September last. I know of no town which, with like advantages in point of equipment, does work superior to that carried on in our schools, and it has been a pleasure to take up the management of their interests when the future promises so much in aim and realization. The working out of new problems becomes easier and the school spirit rises above the spirit of drudgery to the spirit of high ideals.

I must emphasize the importance of what was but touched upon in the last report; the elimination of number work from the first two years of school. It has for years been a constant source of annoyance to teachers, that children after studying arithmetic so steadily and for so many years, should at the end

of their school life know so little about it. For years they have studied numbers in every way and from every point of view and then at last we have too often found mental confusion instead of accuracy of results. During the present year the first and second grades have let number work severely alone save as it came up in an incidental way in connection with ordinary matters.

When these children in their third year do begin to deal with numbers, they will come to the work at an age when they are better prepared to deal with it understandingly and with a delight in the novelty of the study which pupils do not have whose first two years have been filled with the almost endless repetition of the Grube method.

It is confidently expected that the results will be better and clearer at the end of one year's work in number begun in the third grade than at the end of three year's work begun with the first school year. There will be less blindness in the methods of attacking the subject, the reasoning powers will not be prematurely brought into action, and the pupils will more readily distinguish between abstract numbers and their applications to practical processes. It will as a matter of course be some time before the results will show themselves in upper grade work, but it is very clear that the plan is psychological in theory and practical in its results.

The tendency in language work for a long time has been to subordinate the study of the grammar to the study of the composition, and rightly so, but it has been a matter of varied opinion as to the degree of the subordination. It has always seemed to me, that up to the seventh year of school life at least, the language work should be almost wholly on the side of composition; from the seventh year on, for the remainder of the grammar school course, the study of the structure of the English language should assume a considerable share of the school attention, and particularly does it seem to me desirable that pupils before entering the high school should have a well defined knowledge of the structure and varied forms of the English tongue, a knowledge sufficient to enable us to dispense with

further elementary instruction in the high school along that particular line.

Such a study of English grammar should not be directed particularly with the purpose of preparing the pupil for the study of foreign language, but for the better understanding of the various phases of meanings and force, of which the English word and the English sentence are capable.

Since the commencement of the fall term, arrangements have been made with the State Normal school at South Framingham, whereby a number of the members of the senior class in the school have been assigned to our schools from time to time for practice and observation.

The young ladies who come to us from the Normal school remain five weeks at a time, and for the past two terms have been engaged mainly in the Wilson and Oak Grove schools. The arrangement has proved advantageous to all parties interested.

The assistance which has been given in the rooms where the student teachers have been engaged has been in the direction of class work and individual help, more especially in the latter way. In these rooms pupils who are slow in mental grasp and who are inclined to fall behind their fellows have been able to receive a greater amount of personal attention than is possible under other circumstances. The assistant teachers besides the opportunity of observing correct methods of teaching have received practice in handling classes and in dealing with individual children, while their presence has acted both as a relief to the regular teacher from much routine work and as an incentive to the careful and skilful presentation of the lesson for the observation of the assistant. The continuance of the plan for certain portions of each year is certainly advisable.

The Individual in Education.

The consideration of the advantages which we derive from our co-operation with the Normal school leads me to speak of a theme which is of paramount importance in public school work

and which is often very much neglected—the conception of the individual as the real unit in school life and education.

From the report of the principal of the high school the concession which has been made to that idea will be observed. In the lower grades we must come to a solution of the topic from a different direction. The longer one has to deal with schools and their problems, whether as supervisor, as teacher, or as parent, the more apparent does it become that a school system grows in efficiency in proportion as it recognizes the needs of the individual child and meets them. We may theorize about the average child as much as we will, but the average child will resolve itself into a number of different individuals when our theories are put into practice.

To be sure it is of vast importance that we have correct methods of teaching, that we have excellence of organization and completeness of detail, but after that has been attained a school may still be a long way from approaching the ideal school. It is possible for a school in the perfection of its organization to approach the accuracy of a machine, but unless it have points of contact with the life of the individual child and makes itself in every sense a part of his life, it still remains a machine, hard, unyielding and unsympathetic, concerned chiefly in turning out its intellectual products, while leaving its æsthetic and moral forces to grow up as they will. In proportion, however, as the school becomes an element of interest in the child's life, in proportion as it subordinates the mass to the units in importance, so far will the school attain a high level of success. There is no doubt that this principle is widely recognized and the majority of teachers endeavor to their utmost to transfer it from theory to practice, but there are so many individuals for each teacher to deal with that it becomes a matter of much difficulty for her to enter as fully into their lives as she would like. It ought to be possible for a teacher to have the kind of information she most needs to deal with her pupils at the beginning of the year. As a rule, they have been obliged to take them as utter strangers and spend much of the year in learning their ways and needs. If the teacher could know some of the things about the child's mental and physical makeup

which the parents know, if the school and the home were in closer touch at this point it would make a vast difference in the school lives of many children.

Teachers ought to know which of the pupils who come to them at the beginning of the year suffer ill health; whether they tire easily or not under stress of work; whether they have been growing rapidly in height or weight, and which children show a taste or distaste for school work. It is much better for the teacher to know these things at the outset than to be forced to learn them one at a time by experience with the children.

I believe it both practicable and advisable for our school system as children advance from room to room and from teacher to teacher, to carry along with them reports, not of scholarship, but touching upon these matters I have mentioned, reports which will sum up each year the results of the experience of the teacher of that year with each pupil, reports which will let the succeeding teacher at once, a little closer into the life and capabilities of the individual child, and will lead to a better understanding of child nature. These reports in leaflet form would give a concise summary of the points most needful for a teacher to know. Particularly is this advisable in the case of children who pass from the grammar school into the high school, making a decided change of school life and system at a time when it is most necessary for young people to have careful guidance. It is for the interest of the high school to have all the information possible regarding the inclinations and habits of study of their new charges and this information and more beside could be supplied by the school below and by the home, each from its own observations.

In connection with this matter and with a knowledge of the influence that any physical defect will have upon school work in general, I should recommend that simple tests of the pupils' eyesight be made each year and possibly tests of the hearing as well, to ascertain what pupils are deficient in these respects. It is the custom of all our teachers to look out for marked cases of defect in either particular and to give children who are so deficient, seats where they may have the most favorable opportunity for study, but there are so many cases which

escape the teachers' notice, and the injurious effects of continued neglect are often so great, that I believe we should do well to furnish the schools, as is done in so many other towns, with the opportunity of making a closer test.

Many of our school rooms are at times quite dark, and if there are opportunities of favoring those children who are deficient, we should by all means do so. The course of procedure in making such tests is both simple and inexpensive, and it simply consists in asking the children, one at a time, to distinguish letters of a standard size at certain distances or to distinguish radiating lines, while tests for hearing could be made either from the conversational tone, or more accurately by distinguishing the ticking of a watch. Both these matters have come to be commonly recognized as an essential part of the school work, and the schools of Natick should give them attention.

The Community.

For many reasons it would be of decided advantage if the schools and the community could come into closer relationship. The earnest, interested body of men and women who send their children to school should know the schools and the teachers, and there should be, moreover, some organized society of Natick citizens with whom the teachers could meet from time to time and talk over educational topics, whether such topics were directly or only indirectly connected with the public schools. The Mothers' Class connected with the Woman's Club is a very helpful factor so far as its influence extends, but it does not come into close relationship with the teachers, nor can it reach out upon many of the broader topics which are factors in a general education.

Such topics as school hygiene, school decoration, musical and art education, physical, manual, and domestic training, child study and library work are broad topics, worthy of the consideration and discussion which they would receive at the hands of an organized body of men and women, and altogether too great to be more than mentioned in this report.

Contagious Diseases.

The attendance in several of our schools has been considerably broken up during the fall and winter terms by the unusual prevalence of contagious diseases, the Eliot school at South Natick having suffered the most. This school was closed for about two weeks, early in the fall, and has since been visited by quite an epidemic of minor diseases.

It is quite a question as to the extent such diseases are disseminated by the schools, but at any rate, too great precautions can not be taken at any time to guard against possible outbreak. The school drinking cups should be washed out by the janitor every day in a solution of sulpho naphthol, or a similar disinfectant, while any school supplies which must be subject to indiscriminate distribution such as drawing pencils and brushes and surplus supplies might be easily and cheaply disinfected by formaldehyde, facilities for the use of which could be easily and inexpensively provided.

Repairs.

The past year has witnessed a general overhauling and repairing of such school buildings as would profitably admit it, in both exterior and interior work. For more details, the financial statement may be consulted. In a few words, the repairs have been as follows:

At the high school building the main roof has been retinned together with the roofs of the entrances to the basement, a new fire escape has been added to the building to meet the requirements of the state law; five rooms and one hall way have been painted or kalsomined; a ventilating hood has been placed in the laboratory; the cloak room facilities have been enlarged and one new window has been added to improve the light. In addition, the flue heater in the basement has been connected with the steam piping in the lavatories so that while the school is not in session in winter time, it will be unnecessary to keep fires in the large boilers, thereby making a saving in fuel. All the plumbing in the building has been overhauled and put in sanitary condition. Welsbach burners have been placed on the gas fixtures for use on dark days.

At the Wilson school, the exterior of the building has been painted, while in the school rooms the walls have been painted and the ceilings whitewashed; new floors have been laid and oiled in nearly all of the rooms, one hundred desks of an adjustable pattern have been introduced and the ventilating apparatus in the closets has been overhauled and put in working order. The boilers have also received extended and necessary repairs.

The Eliot building has been painted, as well as the walls and ceilings of two rooms and the lower hall way; seventy-five new desks have been purchased, the heating apparatus has been put into thorough repair, the pipes and conductors on the exterior of the building have received attention and new floors have been laid in several of the school rooms and part of the hall way. The Pond street building has been painted and the interior walls and ceilings have been tinted.

The Cochituate street building has been similarly treated and in addition a new fence has been built in the rear.

The Harvard building has been painted, the hallways as well; the floors have been oiled, sewer connections made, doors and windows tightened and repaired and the water supply protected from freezing.

At the Southville school, water has been brought into the school room, dry wells have been dug to protect the foundation walls, and the exterior of the building has been painted.

At several of the schools much grading and concreting has been done.

Besides all these, repairs of a general nature due to leakage and breakage have been made at all the buildings. The condition of the High, Wilson and Eliot schools is now excellent, the Bacon and Felchville schools are very much dilapidated, the small, one-room buildings are in fair order, while the other buildings are all in need of modern heating and ventilating facilities.

The report of the principal of the high school is appended. It has been found necessary, as I have before said, to increase the teaching force here during the past year as well as the facilities of the commercial department. In all probability this department, together with the laboratory, will need further

equipment during the coming year. The continued growth of this school and its future promise should be a source of gratification to the citizens, as its excellent condition and healthy tone of work is to me.

HIGH SCHOOL.

NATICK, MASS, Jan. 25, 1901.

Mr. A. L. Barbour, Superintendent of Schools :

I herewith submit my fourth annual report of the high school.

The graduation exercises of the class of 1900 took place in Concert hall, June 27. Music was furnished by the Temple quartette of Boston, and was paid for by the graduating class out of the proceeds of the entertainment which was given in the spring. The programme was as follows :

MUSIC.

Temple Quartette.

WHAT IS AMERICANISM?

Bernard Ignatius McManus.

MUSIC.

Temple Quartette.

THE BREAD AND BUTTER QUESTION.

Marion Christine Johansen.

MUSIC.

Temple Quartette.

THE LARGER LIFE.

Ethel Iona Moody.

MUSIC.

Temple Quartette.

THE SPIRIT OF LIBERTY.

Fred Eugene Sturgis.

MUSIC.

Temple Quartette.

PRESENTATION OF DIPLOMAS.

By Mr. Horace B. Gale,
Member of School Committee.

MUSIC.

Temple Quartette.

The names of the graduates are appended.

Benjamin Milton Hall,	Thomas Joseph Shea,
Silas Bryden Hayden,	Joseph Theodore Wignot.

Of the graduates of 1900, one entered Cornell, one Exeter, one Boston University, one Amherst, two Wellesley, one Massachusetts Agricultural College, one Massachusetts Institute of Technology, one Worcester Polytechnic, four are attending Normal schools, four hold positions as stenographers and typewriters, and eight are pursuing post graduate courses at the high school.

Since September last, two hundred and ninety-six pupils have been enrolled in the school. The present membership is two hundred and sixty-six, of whom one hundred are boys, and one hundred sixty-six are girls. Arranged by classes, there are forty seniors, fifty-nine juniors, sixty-six sophomores, ninety three freshmen and eight post graduates.

A rational course of study was adopted in March by the Committee, and put into effect in September. Thus far it promises to be a success. It differs radically from the courses in use in most high schools, in that it is almost entirely elective. English being the only study absolutely required of all pupils.

By this course distinct advantages are gained. It recognizes the fact that pupils differ widely in ability and the power of acquisition, and also possess different tastes and talents. It allows those, who can attend the high school a short time only, to pursue the studies best adapted to their needs, and at the same time gives the student who desires to attend some higher institution the opportunity to select the studies in which he is required to be fitted. It tends to prevent pupils who have made mistakes in the selection of courses from becoming discouraged through failure, and dropping out of school entirely, since under an elective system mistakes are easily rectified, whereas under

the old system a mistake at the outset was well-nigh fatal to all hopes of successfully completing the course.

An elective system requires wise and thoughtful administration. Election does not mean that a pupil may choose studies which merely please his fancy, or which will give him an easy time. It means that studies are to be chosen by each pupil which are particularly adapted to develop his individual powers. But the pupil may not know what studies are best for him, hence his teachers must be consulted. Members of the first year class should be guided in their elections by their ninth grade teachers, who are thoroughly acquainted with their several abilities and acquisitions. Pupils in the higher high school grades can be more trusted to make a wise choice, yet they should consult freely with their teachers.

To make the mistakes as few as possible, the principal of the school should have the power to revise any election which seems to be defective.

The course of study is given below:—

First Year.

At the present time secondary schools are attaching considerable importance to the teaching of science, being largely influenced by the colleges that make science an entrance requirement.

The best teaching of a science calls for laboratory practice and individual investigation on the part of the pupil. Satisfactory results can be accomplished in no other way.

The laboratory facilities of our school are meager. It is possible to make them more adequate to our needs by the purchase of additional apparatus. The expense would not be great, while the increase in the attractiveness and efficiency of our science work would be most marked.

The popularity of the commercial branches continues unabated, particularly Stenography and Typewriting. More pupils are anxious to pursue these studies than can be cared for by the

teacher. Excellent work is being done, although the large numbers prevent sufficient drill in the use of the typewriter. Many of our more advanced pupils are capable of filling satisfactorily positions as stenographers and typewriters.

Parents are cordially invited to visit the school and confer with the teachers regarding the work of their children. Such visits stimulate both pupil and teacher, and often awaken in the parents themselves a deeper interest in school matters. Many times a conference between parent and teacher results in better work, better attendance, and added interest on the part of the pupil, and gives the teacher a more intimate knowledge of the pupil's habits and peculiarities, thereby securing for him better and wiser training.

At the end of each ten weeks report cards are issued showing the condition of the pupil's work so far as the teachers are able to estimate it. It would be of special advantage if parents would examine carefully these cards, and require a satisfactory explanation of any defect. If the pupil will not, or can not, explain, let the teacher be consulted. A little time and energy expended in this manner will be well repaid by the benefit conferred upon the pupil, and indirectly upon the school.

In closing I wish to mention the friendly spirit exhibited by our pupils in the many little acts of kindness and helpfulness which make school work attractive; and also their apparent appreciation of the advantages afforded them by the town, and their earnest efforts to improve them to the utmost.

I wish also to acknowledge the continued support given by the school officials, and the hearty co-operation of the teachers in furthering any plan which promises to be of benefit to the school.

Respectfully submitted,

HORACE W. RICE,

Principal.

The work in music has been conducted under the same excellent supervision as in years past and the report below given will explain its progress and conditions.

REPORT OF THE SUPERVISOR OF MUSIC.

To the Superintendent of Schools :

I herewith submit my annual report of the music in the public schools of Natick.

The series of books and charts which was adopted three years ago, the Natural Music Course, is still in use throughout the town. These books, with a very few exceptions, are in good condition.

The plan of work as it is represented in these books is what is known as the "Spiral Plan." This system is based on the psychological idea of starting with the known and proceeding to the unknown. Each new feature is introduced in some way already familiar to the pupils, and then represented in a new form. Several drill exercises are then given on this new principle combined with some of the difficulties that have gone before. As the children pass from grade to grade in their school course, they find these different elements of meter and chromatic tones more fully developed as they advance; while principles with which they have become familiar are constantly reviewed.

In September the outlines were revised and new outlines given to the teachers. These outlines are to serve as a guide to the regular teacher in using the material assigned to her grade.

The music in the high school has been optional as in former years and both divisions of the music class have been large. In addition to the regular work, some of the familiar patriotic songs have been studied and the words committed to memory. This has been done in the lower grades also. So far as has been possible, while the pupils have been studying these songs, I have told them the circumstances under which they were written and something of the author.

The usual number of rote songs has been taught in the primary grades this year. These songs used freely at the beginning of the first year in school, serve to unite the voices in tune-ful singing. Then the scale is taught followed closely by the musical symbols.

It has been the aim to make the study of music such that it will develop the minds of the children and do its share toward educating and uplifting the æsthetic side of their nature and at the same time create a love of song in the pupils that will prompt singing good songs even while outside the school room.

While laying the foundation for correct musical training, it has been remembered that many will not continue this study beyond their public school course and the most important facts have been carefully dwelt upon, at the same time forming a good basis for those who may have an inclination to pursue the study of music to higher possibilities.

I wish to thank the Superintendent for his kindly support and the committee for its continued interest in the work. The teachers too have my hearty appreciation and thanks for their faithfulness in the work.

Respectfully submitted,

ELLEN HOWE BARTLETT,

Supervisor.

The work in drawing will be best explained by reference to the report which is subjoined. The extension of its privileges to the high school students was of very great advantage to the school.

REPORT OF SUPERVISOR OF DRAWING.

To the Superintendent:

I herewith submit my report of the work in drawing, done during the past year.

The work this year has been *good*, especially in the drawing of flowers, grasses, etc., in water-color, ink, colored pencil and pencil. Pencil work will have more attention paid to it, in order to have each pupil gain familiarity with this medium and a free, broad way of working. Children enjoy the work in color, because it is so attractive, while brush work appeals to them, because of its simplicity.

In the primary grades, besides studying the flowers, grasses, seedpods, etc., animals and birds from life have been drawn with brush and ink. An imaginative story, having for its theme the animal or bird drawn in a previous lesson, was next given; this has been followed by the use of the animal or the bird in a simple decorative scheme.

Drawing from memory is most important, for children are naturally imaginative, although this power sometimes lies dormant, and if they are carefully trained they do *not lose* their originality but *add* to it, that of rendering their ideas in a more *artistic* form.

In the grammar grades, the plan of studying and drawing, then drawing from memory, and finally treating plants, etc., in a decorative manner, has been followed with much success. Ink work in three or four tones has been added to the principles of design, thus bringing out new thoughts of a subject. Imagination sketches in three tones have proved most interesting to both teachers and pupils.

In the high school, instruction in freehand and mechanical drawing has only been given for the last four months, but in spite of the fact that each class has but *one period per week*, the work has steadily improved. There are three classes, one in freehand and two in mechanical drawing. The former class has worked from groups in pencil and charcoal, and the latter classes have geometrical drawing which will be followed by orthographic projection. Both classes will have original work in design later in the year.

The lecture room in the high school serves admirably for the classes in mechanical drawing, but is very crowded for the class in freehand drawing owing to the large tables it contains. If the entering class next year is as large as it was this year,

some provision for heating and using the store room will have to be made, for the classes will have to be divided into a "Beginner's Class" and an "Advanced Class." This will necessitate more room.

Each school needs a collection of pictures and of artistic pottery. The first could be procured by cutting illustrations from magazines, etc., if some friends of our schools would donate some old magazines for this purpose, and the second could be bought if a certain sum per year for each building or school room was set apart for this purpose.

In visiting the different schools I have found the nucleus of a collection being started by the children themselves, and this is a spirit which will be fostered.

There has been an earnestness of spirit, and an enthusiasm on the part of the teachers and pupils in carrying out instructions, for which I heartily commend them.

Respectfully submitted,

ELISE H. CARRET,

Supervisor.

I have been heartily interested in and in accord with the work in sloyd carried on among the boys in our upper grades. Although it has been introduced into our schools but a short time, I doubt if any one would now characterize it as a fad or useless frill. Its effects are so plainly apparent in the general bearing of the boys who work in it that it cannot be too heartily recommended. The recommendation of the instructor last year that the work be extended to the girls, is a fitting one, and there are cogent reasons for doing so. Professor Mosso has made this statement, and experience bears him out, "If we wish to hasten the development of the brain, the question is to be decided whether we can better secure this result by stimulation of the senses and intellectual work or by muscular exercise." There is every reason to believe that our work in sloyd is making directly for the development of strong character and its advantages should

be at some time available for both sexes. It must be borne in mind that work in sloyd does not confer as its chief advantage a facility in the use of tools, but a direct effect upon the mental action, and for this reason is of value to boys and girls alike.

REPORT OF SLOYD INSTRUCTOR.

To the Superintendent of Schools:

Last year being the first year of sloyd in the Natick schools, the pupils were practically beginners. This, the second year finds the classes better organized and graded. Marked improvement should be realized in the succeeding years as the pupils gain experience.

The results of last year's work are now becoming more evident as the weeks pass by. There is a decided gain shown in the work of the boys, in that they are able to handle the tools with more skill, and a very important point is that they show a gain in planning and thinking for themselves. This latter point is manifest in their original work.

A very pleasing condition is the fine attitude of the eighth grade classes toward their work; consequently they obtain good results. This spirit indicates the wholesome effect that sloyd has upon school life. A number of the ninth grade boys show good advancement and a healthy interest in their work.

The high school boys show a deep interest in anything they undertake, and are steadily advancing in their skill with tools, in originality and independence.

The idea of combining thought and action is one of the vital principles of sloyd, and together with this a love for the work. This love for ones, work is a great help in building up a healthy mind, and sloyd aims for such a result. I have felt that some of the boys who failed to appreciate this last year have caught this spirit of the work and are consequently happier in it.

As was stated in my last report, "Sloyd is not merely a set of objects;" but this branch of manual training allows wide scope in the articles produced, and the manner of producing. The advanced pupils should be able to make models of considerable size and beauty, such as chairs, tables and other pieces of furniture.

As the boys progress a further advance should be made in the outfit of the school. The boys in the eighth, ninth and high school grades are the ones receiving instruction in the sloyd school. After two years of tool work they should be able to do quite advanced work, and to give them the best advantages when they reach the high school grades, I recommend that wood turning lathes be introduced into the building, together with motor power. As a means of training the powers of concentration, the eye, and sense of form, this branch of wood work is exceptionally fine.

Respectfully submitted,

GEORGE E. HOUGHTON.

In concluding my report, I must express to the citizens, committee and teachers who have made my work pleasant for me, the thanks which I owe them for their co-operation. It is only by working together that we can attain the highest ideals and my experience thus far in Natick leads me to see the brightest promises for the future.

Respectfully submitted,

A. L. BARBOUR.

ANNUAL REPORT
OF THE
BOARD OF HEALTH
OF THE

TOWN OF NATICK

FOR THE
YEAR ENDING JANUARY 31, 1901.

NATICK, MASS.,
PRESS OF NATICK BULLETIN.
1901

REPORT OF THE BOARD OF HEALTH.

The Board of Health of the town of Natick herewith present their annual report for the year ending January 31, 1901.

The organization was the same as last year. The regulations of previous years were adopted and ordered printed in one of the local papers. At the last annual town meeting under Article 27 one hundred dollars was appropriated to improve the south arm of Pegan brook and some appropriation will continue to be a yearly necessity until measures are adopted to prevent its being made the common receptacle for things usually deposited in back yards, to say nothing of dead cats, dogs and other matter too repugnant to mention. Hoping to correct this condition of things, the board has deemed it wise to present the case in all its disgusting abhorrence, that the town may be led to take some stringent, effective measures to make our drinking water presumptively palatable. Just what plan should be adopted to accomplish the desired end, is wholly within the province of the town to determine. The one hundred dollars appropriated has been judiciously expended and the entire length of the brook by careful examination presents, at this time, a cleanly and satisfactory condition. Numerous complaints have been made, however, during the year of the condition of our drinking water in some particular parts of the town. Why this should be thus limited and not the universal complaint it is difficult to determine.

About the middle of December we requested the State Board to give us the analysis of the last sample taken from Dug Pond. This they did with sample taken December 3, the result showing as pure condition of the water as at any previous year. The Metropolitan Water Board has been very persistent and exacting in their demands upon this board towards carrying out the provisions of Chapter 132 of the Public Statutes. We have executed our duty in so far as it relates to serving a legal notice upon 112 property holders. Some of these have readily complied with the order, while the larger part have merely signed an application with the Superintendent yet made no money deposit as required by law. There are at this time 435 complete connections with the public sewer. Of this number, 89 have been made the past year; 28 have made connections from the street to the outside of the cellar wall, making no move toward completing the plumbing. Of this last number 3 were made as far back as 1896, 1 in 1897, 1 in 1898, 4 in 1899, and the remainder (19) during the past year. Thus will be seen the utter indifference shown on the part of some in fulfilling the mandates of the law and in meeting a slight portion of the expense incident to the sewerage system.

An article will be brought before the coming town meeting to relieve if possible the expensive prosecutions which might otherwise follow. The connections already made with the public sewer have materially lessened the calls for the abatement of nuisances. About 60 such calls have been made the past year; three dead horses besides several dogs, cats and smaller animals have been buried.

Basins.

It is a decided pleasure and relief to know that a bill has been introduced into the Legislature and referred to the Committee on Public Health having reference to the shallow flowage basin of Lake Cochituate known as Long Pond meadow. Its condition the past season again became the

source of great annoyance and danger to the health of the people living in its vicinity. It is now thought to be the purpose of the Metropolitan Water Board, sanctioned by the State Board of Health, to rebuild the dam at the old dyke.

This experiment was once tried for a term of years by the city of Boston and proved to be a nuisance and the whole structure was removed. It would hardly seem a credit to good judgment that this project should be revived, coupled as it is with the unanimous objection of resident property owners whose health we feel under obligation to respect, however great the money expenditure. The remedy that has been repeatedly suggested and which seems to us at this time, a feasible one, would be to contract the area of the basin, taking such care of the borders as any sanitary engineer would deem imperatively necessary, and so deepening the channel as to give a free flowage of water at all seasons of the year.

Swill and Garbage.

The question of swill and garbage disposal has become of so much importance that this board has deemed it their duty to give the collection and disposal of such matter to some one who will faithfully and neatly remove the same without giving offense to anyone. This is to be done at least three times a week during the warm weather, and twice each week in cold weather and in a well painted, water-tight cart or wagon suitably labelled, "Health Department." The person allotted this contract will be protected during the three years of its continuance if he executes his duty to the satisfaction of the board.

Licenses.

Received for plumbers' licenses	.	.	.	\$3 00
" for swill and garbage licenses	.	.	.	4 00

Received for slaughter-house license	\$1 00
Total	<u>\$8 00</u>

The above amount has been paid into the town treasury.

The mortuary record for the past year speaks well for the general healthfulness of the town. With a population of nearly 10,000, few towns in the Commonwealth can present a better showing.

The total number of deaths in town during the past year, exclusive of still births, was 123, males 58, females 65. A decrease from last year.

Number dying in other towns and brought here for burial 2

ANNUAL REPORT
OF THE
BOARD OF TRUSTEES
OF THE
LEONARD MORSE HOSPITAL,

NATICK, MASS.,

1900.

NATICK, MASS.,
PRESS OF NATICK BULLETIN.
1901.

REPORT OF TRUSTEES OF LEONARD MORSE HOSPITAL.

The Trustees of the Leonard Morse Hospital have the honor to submit their eighth annual report.

The Hospital has now been in operation nearly two years, so that the Trustees are able to speak from experience of its needs and requirements, the expense of maintaining it, and the income to be expected from the invested funds. In the short space allowed for this report, it would be impractical to attempt to give in detail all of the items, but, in a general way, it may be stated that the expenses during the year ending December 31, 1900, amounted approximately to \$8,546.58, and the income during the same period to \$8,462.06.

It must not be assumed from this that the Hospital is not in need of a larger income, nor that it could not accomplish more good if more funds were available for present use. By the terms of Mrs. Morse's will the Trustees are restricted to the income from the invested fund for the support of the Hospital, and have no right to apply any part of the principal towards it. This income, of course, amounts to a considerable sum, and much of the burden of supporting the Hospital is thus relieved against, but there still remains with those interested in charitable work and willing to do their share of it, the duty of supplying such additional aid as may be required. In cities and towns where hospitals have been established, and are without an endowment, the burden of securing funds with which to carry the work on has been found to be very great and to require constant, persistent and unremitting efforts. Happily, the generosity of Mrs. Morse has rendered much of this work unnecessary, but it has been found not sufficient to relieve the people of Natick of all

responsibility of caring for their sick. Indeed it would hardly seem desirable that it should; for in a local charitable institution of this kind — an institution belonging to and managed by the town through a Board of Trustees chosen by it — how can the interest in its success be better awakened and kept up than by leaving a part of the burden of looking after and caring for it on those who are its chief beneficiaries? The wants of the Hospital are constantly increasing, and the work to be done by it is also constantly increasing. Additions, alterations and repairs, as well as new furniture, new instruments and fresh supplies, are and will, from time to time, be required, and it is certain that more money must be had if the work is to be well done and the Hospital service made thoroughly efficient.

The management, therefore, while not wishing or intending to be unduly importunate, have deemed it their duty to make known these growing needs and demands of the Hospital, and to solicit for it aid from such sources as it may be had. It is not necessary that this aid should be in the form of money; supplies of any kind that can be used will be equally acceptable.

During the year there was established in connection with the Hospital a Training School for Nurses, and there are now six pupil nurses taking a regular course of training in it. It was felt that it would promote the efficiency of the Hospital force, and also enable outside persons wishing the services of a trained nurse to obtain one at short notice by applying at the Hospital.

The devise of the late Edgar S. Hayes has been paid over to the Trustees by his executors. The clause of his will relating to the gift is as follows: —

“In grateful memory to my uncle, Rufus Morse, I give, devise and bequeath five thousand dollars for a free bed in the Leonard Morse Hospital to be known as the “Rufus Morse Free Bed,” and I hereby direct that the Trustees of the Leonard Morse Hospital in Natick shall invest this gift in some safe sureties, the income of which shall be used to support said free bed, but the principal is to forever remain intact to perpetuate the name of Rufus Morse.”

Miss Elizabeth Cheney, daughter of the late B. P. Cheney, also generously gave to the Hospital one thousand dollars for such uses as the management might think best, and, with the approval of Miss Cheney, it has been or is to be applied to the purchase of an ambulance and an X-Ray machine.

The South Middlesex Railway Company also gave a pass in its cars to each of the physicians on service at the Hospital during the year.

The medical staff, with the addition of Dr. E. E. Bancroft of Wellesley, remains as last year, and consists of

CONSULTING SURGEONS.

It should not be forgotten that all of these medical gentlemen have given, and are giving, their valuable services to the Hospital without charge, and that they are entitled to the thanks and gratitude, not of the patients alone, but of the community at large for the services thus rendered.

Miss Eliott still remains in charge as Superintendent, and her management has met and does meet with the hearty approval of the Trustees. Her report is herewith published.

REPORT OF SUPERINTENDENT.

LEONARD MORSE HOSPITAL, DECEMBER 31, 1900.

To the Trustees :

GENTLEMEN:—I have the honor to present herewith my second annual report of the hospital for the year January 1 to December 31, 1900, inclusive :

STATISTICS.

Number of patients in the hospital Dec.		
31, 1899		10
Admitted from Jan. 1 to Dec. 31, 1900,		
inclusive		100
Males	45	
Females	55	
Medical	27	
Surgical	73	
Treated during the year		110
Discharged well	55	
Discharged improved	40	
Discharged unimproved	2	
Died	11	
		<hr/> 108
Remaining in hospital Dec. 31, 1900 .		2
Number of operations		49
Deaths within 24 hours after admis-		
sion		2

Deaths within 48 hours after admission	2
Largest number of patients in hospital during 24 hours	12
Smallest number of patients in hospital during 24 hours	0

NATIVITY OF PATIENTS ADMITTED DURING THE YEAR.

United States	73
Ireland	11
England	5
Sweden	1
Denmark	2
Holland	1
Poland	1
Canada	6
Total	100

There has been received \$2,138.80 on account of all classes of paying patients.

From town cases	\$ 422 50
“ private patients	1,259 84
“ ward patients	456 46
To this may be added for outside services of nurses and for surgical supplies	422 79
Total	\$2,561 59

Eighteen of the one hundred patients have received free treatment. Acknowledgment should be made of the gratuitous service of the physicians and surgeons to the ward patients, amounting to not less than \$1,250.00 for the year.

The Trustees of the Hospital have established a Training School for Nurses. The course extends over two years and includes instruction from text-books and manuals of nursing, daily

drill by the Superintendent of Nurses and head nurse in the wards, operating room and other departments of the hospital, also lectures and demonstrations by the physicians connected with the Training School.

Instruction in massage is given by Mrs. Gulli J. Callowhill, who has charge of the teaching of massage in the Boston Normal School of Gymnastics. The course of instruction in cookery is under the charge of Mrs. Mary Boland Bequignot. Those wishing to enter the Training School should apply to the Superintendent of the Hospital. The Hospital has been remembered in many ways during the year, and we hope for an increase of contributions next year, for the needs of the Hospital are many. Donations of groceries, vegetables, fruit, jellies, preserves and linen are of great assistance in meeting the running expenses.

In presenting my second annual report to the Trustees, I wish to renew my sincere acknowledgments for their personal kindness and official support.

Respectfully submitted,

EMMA T. ELIOTT,

Superintendent.

RULES AND REGULATIONS.

SUPERINTENDENT.

The Superintendent of the Hospital shall be an educated nurse, trained in executive duty. Subject to the Trustees, she shall have the whole responsibility of the conduct of the Hospital, of the nursing service and the training of nurses, and of the execution of all directions given them by the attending physicians and surgeons; and shall have sole oversight of the house-keeping in all its departments, and be responsible for the orderly condition of the household and its work.

She shall have the power of appointment and removal of all employees under her direction.

She shall keep an account of all furniture and hospital property; she shall keep such accounts as are placed in her charge, of all money received and expended by her, and shall render a monthly statement thereof to the trustees.

She shall take charge of all money and other personal effects belonging to patients, shall keep a record of the same in a book provided for that purpose, and shall take a receipt for the same when returned to the patients. When a patient dies she shall furnish the Trustees with an inventory of all the effects and the Trustees shall direct their disposal.

She shall purchase provisions and supplies of all kinds, examine them when received, and be responsible for their proper quantity, quality and cost, and for their proper care and economical use.

She shall keep memoranda of breakage or losses occasioned by the patients or otherwise, and she is directed to require payment for any article carelessly injured or broken, and to make a report each month to the trustees.

She shall keep a record of all gifts received at the hospital.

She shall receive all patients recommended for admission in the manner directed by the Trustees.

She shall see that the proper surety is furnished for the payment of hospital charges, and shall assign patients to appropriate beds or rooms.

She shall keep a register of all patients admitted, noting the particulars of the same, filling out the bed card, etc., in the manner provided. When a recommendation is received for the discharge of a patient, she shall act upon the same, and shall attend to the settlement of the patient's accounts.

She shall keep a record of the discharge, and, on the part of the hospital, see that the removal is made with all the care the patient's condition may require.

She shall see that all patients receive proper attention on admission, that everything necessary is done for their care and comfort under the direction of the attending physician, or of the physician or surgeon by whom the patients have been sent, and that all proper care is given during their stay in the hospital.

She shall report to the trustees monthly the names and conditions of all patients remaining in the hospital more than four weeks.

She shall send for the physician or surgeon in attendance in all cases of emergency, or if he cannot be found, for some other member of the medical staff.

When the condition of a patient becomes dangerous, she shall immediately notify the friends and relatives of such patient.

Upon the death of a patient she shall immediately give written notice to the family or friends requesting them to make proper arrangements for removal. No body shall be removed between the hours of 6 p. m. and 7 a. m. She shall keep a copy of notice sent to relatives of deceased patients. Upon delivery of the body to the friends or the undertaker she shall take a receipt therefor.

No instrument, apparatus, book or other property belonging to the hospital shall be taken therefrom without her consent, and she shall keep a record of all articles so taken.

She shall daily visit and inspect the wards, kitchen, laundry and all other departments of the hospital.

The superintendent is requested to discourage conversation at her table and in every other place, either in the hospital or outside, upon all topics in the nature of gossip about any patient. Any nurse or servant who disregards this injunction shall be liable to be discharged.

VISITING PHYSICIANS.

The regular medical and surgical service of the hospital shall be entrusted to a staff of six attending physicians who shall be elected by the Trustees, and shall hold their offices for one year or during the pleasure of the Trustees, and until their successors have been elected. The Trustees shall also elect an attending homeopathic physician, and one or more assistant physicians, who shall hold their offices on the same conditions as the members of the staff. The trustees shall also elect one or more physicians and surgeons, who shall be consulting physicians and surgeons, and shall hold their offices until the next annual meeting, and until their successors have been elected.

The term of service of the attending physicians shall be two months each, the order of service to be arranged as provided by the Trustees.

The member of the staff in attendance shall control and direct the management of the patients under his care. He shall prescribe medicine and diet in the manner provided, and give such other directions as may be necessary for the welfare of the patients. All directions shall be given in writing upon the proper blanks and order books.

He shall make visits as required during his term of service, and will be expected to make such visits regularly between 9 a. m. and 12 m.; or he shall provide as a substitute some other member of the medical staff.

In the absence of the attending homeopathic physician having the care of a patient in a public ward, he shall provide, if possible, another homeopathic physician in his place, subject

to the approval of the Trustees. In case he cannot make such provision, the care of the patient shall devolve upon the member of the staff on duty at the time.

The attending physician shall see that a careful clinical record of all patients in his service is kept in the manner provided. This rule applies to physicians and surgeons attending private patients. This record shall not be taken from the hospital, and no extract shall be made therefrom by any person not authorized by the Trustees.

He shall report to the Superintendent all cases where symptoms become serious or dangerous; and when the condition of a patient warrants it, shall recommend discharge, noting the patient's condition, in writing, on the bed card in the manner provided.

He shall also report to the Superintendent all cases of neglect or inefficiency observed by him on the part of subordinate officers, nurses or other attendants or servants.

It shall be the duty of the physician in attendance to call in consultation one or more of the members of the staff in all cases of severe accident and those requiring capital operations; and it shall be the duty of the consulting surgeon or surgeons, when called, not only to give advice, but to either assist at or perform the operation when so requested by the physician in attendance, and in grave cases they may be invited to take charge of the patient. When deemed necessary by the attending physician, and at least one other member of the staff, other physicians and surgeons may be called in consultation, provided it be done without expense to the hospital.

No surgical operation shall be performed without the consent of the patient or those in authority over them, when such consent can be obtained. In cases in which such consent cannot be obtained, a record of the reasons shall be made; and in all operations of a grave character, information of the nature of the operation and the danger attending it shall be given to the patient if able to receive it, or to those in authority if their presence can be obtained.

No operation of a dangerous character shall be performed without the consent of at least two members of the medical staff.

The physician in attendance shall see that no autopsy is made within ten hours after notice of death has been sent, unless with the express consent of the family or friends of the deceased, nor at any time when it shall have been expressly prohibited by the patient or by the family or friends. He shall enter every autopsy in a post mortem register kept for the purpose, giving name of deceased, date of death, notice and examination, whether consent was obtained or not, and by whom the autopsy was made and what it revealed.

No attending physician or surgeon shall receive a fee or any pecuniary compensation from any patient in a public ward.

PATIENTS.

Application for admission must be made to the Superintendent at the hospital.

Patients will be admitted to the hospital upon the recommendation of any member of the medical staff, or any other reputable physician, subject to the rules of admission and the approval of the Trustees. In such cases satisfactory arrangements shall be made with reference to payment of hospital charges.

Patients will be admitted on each day of the week, Sunday excepted, between the hours of 9 and 11 a. m. Emergency cases and persons accidentally wounded or otherwise disabled who are taken directly from the place of accident, shall be received into the hospital at any hour by day or night if proper cases for hospital treatment. The rate to be paid shall be determined as soon as possible thereafter in accordance with the rules of the hospital.

Patients may be admitted to the hospital at such rates as the Trustees may from time to time determine. Payments are to be secured by the employer or friends of the patient, by the authorities of the place where the patient belongs or by the deposit of the amount of two weeks charges, or more if deemed necessary. When in the opinion of the Trustees the circumstances of the applicant require it a whole or part of the charges may be

remitted: The agreement for the stipulated payment shall be in writing in the form provided.

Patients paying ten dollars and fifty cents per week may be admitted to the public wards; all patients in public wards shall be regarded as beneficiaries of the hospital. No patient shall occupy a free bed more than six weeks, except by special permission of the Trustees. Patients desiring private rooms will be admitted upon special terms in each case.

The price of a private room does not include professional attendance. A patient paying for a private room may select as professional attendant any one of the physicians connected with the hospital, and must arrange with him in regard to his compensation before admission to the hospital or on his first visit thereafter.

The Superintendent is authorized to make special terms for patients in private rooms requiring extra nursing, and requiring expensive medical and surgical supplies for their treatment.

Persons suffering from insanity, contagious diseases, acute venereal diseases, or persons having delirium tremens shall not be admitted.

No person shall be admitted to the hospital whose case is adjudged incurable, unless there be urgent symptoms which are deemed capable of being relieved.

Any patient who prefers, can have a homeopathic physician if practicable.

Whenever any patient shall be removed from the hospital without the approval of the attending physician, the Superintendent shall require from the person assuming the responsibility of the removal a written statement to that effect.

Patients must be in the hospital except when allowed to go out by the physician or superintendent.

Patients either disorderly or disobedient may be discharged at the discretion of the Superintendent.

Patients may be visited by clergymen of their own selection.

Visitors to patients will be admitted on each week day afternoon from 2 to 3 o'clock; and on Wednesday evening from 7 to 8 o'clock.

No patient will be allowed to see more than two visitors on the same day. In case of dangerous illness friends may visit the patient at any time by permission of the superintendent. No visitor shall take a meal at the hospital, nor remain over night without permission of the Superintendent.

The standing physician, or the Superintendent by his instructions or in his absence, may at any time exclude visitors from any patient when this seems advisable for the patient's welfare. Visitors are specially cautioned that nothing shall be brought to the hospital for patients, without the permission of the superintendent.

JANITOR AND ENGINEER.

The janitor and engineer, who is under the authority of the superintendent, has charge of the heating and ventilation of the hospital, and shall endeavor to keep the wards, halls and other rooms at the prescribed temperature. He shall see that the gas, electricity and water are properly regulated and not wasted or unnecessarily used, and that the hospital grounds are suitably cared for.

He shall assist in the moving and the care of patients and attend to such other matters about the hospital as the superintendent may require. He shall not leave the hospital grounds without the knowledge and consent of the superintendent. He shall see that all doors and windows are secured, and that the lights are turned off at 10 p. m.

REPORT OF COMMITTEE ON APPROPRIATIONS.

To the Citizens and Tax Payers of Natick:

The Committee on Appropriations met and organized January 2, 1901, and have held three meetings and have given one public hearing.

Sub-Committees were appointed to consider the needs of the several departments in detail for the purpose of assisting the General Committee in its work.

After careful consideration your Committee recommend that the following appropriations be made by the town at its annual town meeting:

Interest and Existing Liabilities.

General interest account and liabilities	\$19,600 00
Sinking fund	1,600 00
	<hr/>
	\$21,200 00

Poor Department.

Maintenance	\$13,000 00
To cover overdraw	2,434 14
	<hr/>
	\$15,434 14

RECOMMENDATION—That Overseers of Poor come before the town for permission to raise funds to carry their department through the fiscal year, if the appropriation made at the annual meeting becomes exhausted before the end of said year.

Police Department.

Maintenance	\$4,300 00	
To cover overdraw	137 16	
		<hr/>
		\$4,437 16

RECOMMENDATION—That pay of patrolmen be \$2.00 per day; Chief of Police, \$2.50 per day.

Roads, Bridges and Culverts.

Maintenance	\$8,000 00
Together with some \$1,700 or \$1,800 to be received from electric railways.	

Support of Morse Institute.

The dog money and	\$1,900 00
-----------------------------	------------

Lighting Streets and Public Places.

Recommendation to be read at meeting	\$5,760 00
--	------------

Rent Account.

Rent of town hall	\$600 00	
Rent of armory	300 00	
		<hr/>
		\$900 00

Necessary Town Uses.

\$2,500 00

Sewer Department.

Rentals for coming year

School Department.

Pay of teachers	\$28,500 00
Pay of janitors	2,200 00
Fuel	1,950 00
Text books and supplies	2,500 00
Ordinary repairs	1,000 00
Miscellaneous	1,350 00

\$37,500 00

Soldiers' Aid.

\$3,000 00

Fire Department.

Maintenance \$5,500 00

RECOMMENDATION—That written orders in duplicate be issued for supplies, and that verbal orders for the purpose named be discontinued.

Paying Town Officers.

Selectmen	\$700 00
Assessors	*900 00

* This sum includes pay for any service or services required in connection with reproduction of tax list.

Registrars of Voters	325 00
Overseers of Poor	450 00
Auditor	250 00
Board of Health	292 00
Town Clerk	500 00
Town Treasurer	500 00
Precinct officers and tellers	350 00

 \$4,267 00

Total	\$110,398 30
-----------------	--------------

Respectfully submitted,

 HENRY C. MULLIGAN,
 Chairman.

TWENTY-FOURTH ANNUAL REPORT
OF THE
Board of Water Commissioners
AND
Superintendent of Water Works
OF THE
TOWN OF NATICK

FOR THE
YEAR ENDING JANUARY 31, 1901,

NATICK, MASS.,
PRESS OF NATICK BULLETIN.
1901.

REPORT OF WATER COMMISSIONERS.

The Commissioners beg leave to submit the following:—

Board organized with F. Bigelow, Chairman, and H. M. Robbins, Clerk.

For detailed account of receipts and expenditures for the year, we would refer to report of the Superintendent.

Owing to the inadequacy of Dug Pond, our present supply, to furnish a sufficient quantity of good water for the present and increasing demands, and also, as we have had a great many complaints the past season about the poor quality of the water, we again feel it our duty to call the attention of the citizens to the urgent necessity of a new water supply.

We also reprint letters from the State Board of Health, giving their opinion as to the condition of Dug Pond, and also on the proposed new supply at Springvale, together with analysis made by that Board.

FRANCIS BIGELOW,
H. M. ROBBINS,
JOHN M. FISKE,

Water Commissioners.

NEW WATER SUPPLY.

July 23, 1897. This subject was taken up with reference to getting better water and a more plentiful supply. On the above date Mr. B. F. Smith, an experienced well driver, visited Natick, and accompanied by the Water Commissioners and Superintendent, looked over many places, but came to the conclusion that only one was practicable, though a decision was made to drive wells in two different locations, one at the west of Dug Pond, which proved a failure, the other on Worcester street, which was a success. Two wells were driven and plenty of water was found, some of which was analyzed and pronounced good for domestic use.

Aug. 1, 1897. Application was made to the State Board of Health for advice in relation to an additional water supply under the provision of Chapter 375 of Act 1888. On Nov. 4, '97, the following letter was recorded:

OFFICE OF STATE BOARD OF HEALTH.
STATE HOUSE.

BOSTON, Nov. 4, 1897.

To the Water Commissioners of the Town of Natick:

GENTLEMEN:—

The State Board of Health has considered your application for advice with reference to a proposed additional water supply for the town of Natick, to be taken from the ground on the easterly side of Lake Cochituate, and just south of the Worcester turnpike, and has caused an examination of the proposed source to be made by its engineer and samples of water from two test wells at this place to be analyzed.

It appears that the consumption of water by the town in 1896 was nearly as great as the probable capacity of the present source of supply in a series of dry years. Moreover, the consumption of water has been increasing rapidly in the last few years and the recent introduction of a sewerage system will have a tendency to increase still further the use of water in the town, so that it is evident that an additional supply has become necessary.

The water shed of Dug Pond, your present source of supply, contains a large population located chiefly along its main feeder, and the pond is exposed to pollution by sewage from this population. Moreover, the intake pipe of your water works is situated upon a narrow arm of the pond into which the main feeder flows. With these conditions, your present source is not a safe one for domestic uses, and the Board would advise that in selecting another source of supply you secure one that is capable of supplying the needs of the town for the present and for a reasonable time in the future, in order that the present source may be abandoned.

The test wells referred to in your application are located on a small peninsular, between the southern and middle basins of Lake Cochituate, which is surrounded on three sides by the lake, and the quantity of water obtainable from the ground here will probably depend largely upon the porosity of the soil and the quantity of water that will filter through the ground from the lake. The soil in this region, judging from surface indications and from the two test wells thus far driven, is coarse and porous, and it seems probable that water will filter freely through the ground from the lake, so that the indications are favorable for obtaining a large quantity of water from the ground at this place.

The quality of the water, as indicated by analysis of samples collected from the test wells, is excellent for the purposes of a public water supply, but these samples probably represented water percolating through the ground toward the lake, and if a large quantity of water should be pumped from the ground at this place, a large proportion, as already indicated, is likely to come by filtration through the ground from the lake.

It is not likely, however, that its quality will change materially from this cause if the water is thoroughly filtered in its passage through the ground. It appears to be practicable to locate the works in such a way that water coming from the lake will have to pass for a distance of at least three hundred feet through the ground, and experience in other places where large quantities of water are obtained partly by filtration from neighboring bodies of surface water, would indicate that if the water is of good quality in the beginning, it may remain so, at least, for many years.

On the whole, the source appears to be a favorable one from which to obtain a large quantity of water from the ground, and the Board would advise that a test be made by pumping from a well or wells in this vicinity at a rate as great as would be necessary for the supply of Natick, and for a period of two or three weeks, and that observations be made by means of test wells of the variation in the level of the water in the ground in order to determine the probability of obtaining a sufficient supply of good ground water for the town of Natick at this place.

The Board will assist you in these investigations by making the necessary analysis of samples of water, and will, upon application, advise you further in this matter when you have the results of further investigations to present.

The present works of the town of Natick include an open distributing reservoir. If a ground water supply is introduced, it will be necessary either to cover this reservoir so as to exclude the light, or to provide a covered reservoir for general use in connection with the works. In the latter case, the new reservoir might be of small capacity, and the present reservoir be kept for use in emergencies.

By order of the Board,

SAMUEL W. ABBOTT,

Secretary.

Nov. 17, 1897. Mr. P. M. Blake, Civil Engineer, came to look over the ground and consulted with the Water Board about a test being made, as recommended by the State Board. An agreement was made with him to make the test, which he commenced on Dec. 20, '97. Eleven wells were driven, nine, two and a half, and two, four feet, at a depth of forty feet.

Jan. 19, 1898. The pump was started and was run till Feb. 2, '98, when the Chief Engineer of State Board gave us leave to stop. About eight hundred thousand gallons were pumped every twenty-four hours from the five wells that were connected, the quality being good as far as the analysis of the same has been reported. Further information will be given to the public as soon as the State Board report, which will be as soon as action is taken.

APPLICATION FROM TOWN OF NATICK WITH REFERENCE TO WATER SUPPLY.

CHAP. 375, ACTS OF 1888.

NATICK, MASS, February 15, 1898.

To the State Board of Health :

Room 140, State House, Boston.

Acting under the authority of Chapter 375 of the Acts of 1888, we hereby give notice of our intention to introduce a system of water supply in the town of Natick, and hereby submit our proposed plans for your advice as to the most appropriate

source of supply, and the best practical method of assuring the purity thereof.

Respectfully yours,

FRANCIS BIGELOW,
HENRY M. ROBBINS,
JOHN M. FISKE,

Board of Water Commissioners.

It is proposed to obtain a supply of ground water from the gravel beds underlying land owned by the town of Natick and lying between the Worcester road (old turnpike), the Saxonville branch of the B. & A. R. R. and Lake Cochituate, said land being located in the town of Natick and distant about one and one-half miles from the railroad station in Natick, and is the territory referred to in the communication of your Board to the Water Commissioners of Natick, dated November 4, 1897.

It is proposed to obtain this water either by driven wells of large diameter arranged in clusters and connected with each other and a main suction pipe by pipes of appropriate diameter, such wells to be located at such points and driven to such depths as convenience in construction and quantity of water available may indicate.

Or, by an excavated well of large diameter, to be retained with heavy stone work, laid dry, and lined inside with water-tight brick work laid in American Portland cement, this well to be covered with appropriate roof to exclude sunlight.

Or, the above methods may be used in combination; in such case the large well to serve as a storage reservoir to meet the demand for rapid pumping.

The water obtained by either or both of the above plans is to be pumped into a standpipe to be constructed on an appropriate elevation within the town limits, such standpipe to be of most modern construction and to have a tight roof to exclude sunlight and air and reduce the danger of freezing in cold

weather. In such standpipe the ground water is to be delivered at or near the high water mark at the top of the structure.

Or, the water may be pumped through the present system of piping in the town into the present reservoir on Broad Hill; in such case the reservoir is to be covered over by an appropriate and durable design in construction in order to preserve the quality of the water.

The opinion and advice of the Board is desired as to the sufficiency and quality of the proposed supply, and its desirability in comparison with the water now drawn by the town from Dug Pond.

PERCY M. BLAKE,
Civil Engineer.

REPLY OF THE STATE BOARD OF HEALTH.

OFFICE OF STATE BOARD OF HEALTH,
STATE HOUSE, BOSTON, March 17, 1898.

To the Water Commissioners of Natick, Francis Bigelow, Chairman.

GENTLEMEN: An application was received from you on February 15, 1898, requesting the advice of the State Board of Health with reference to a proposed water supply for the town of Natick, containing the following outline of your proposed plans:

"It is proposed to obtain a supply of ground water from the gravel beds underlying land owned by the town of Natick and lying between the Worcester road (old turnpike), the Sax-onville branch of the B. & A. R. R. and Lake Cochituate, said land being located in the town of Natick, and distant about one and one-half miles from the railroad station in Natick, and is the territory referred to in the communication of your Board to the Water Commissioners of Natick, dated November 4, 1897.

It is proposed to obtain this water either by driven wells of large diameter arranged in clusters and connected with each other and a main suction pipe by pipes of appropriate diameter, such wells to be located at such points and driven to such depths as convenience in construction and quantity of water available may indicate.

Or, by an excavated well of large diameter, to be retained with heavy stone work, laid dry, and lined inside with water tight brick work laid in American Portland cement, this well to be covered with appropriate roof to exclude sunlight.

Or, the above methods may be used in combination; in such case the large well to serve as a storage reservoir to meet the demand for rapid pumping.

The water obtained by either or both of the above plans is to be pumped into a standpipe to be constructed on an appropriate elevation within the town limits, such standpipe to be of most modern construction and to have a tight roof to exclude sunlight and air and reduce the danger of freezing in cold weather. In such standpipe the ground water is to be delivered at or near the high water mark at the top of the structure.

Or, the water may be pumped through the present system of piping in the town into the present reservoir on Broad hill; in such case the reservoir is to be covered over by an appropriate and durable design in construction in order to preserve the quality of the water.

The opinion and advice of the Board is desired as to the sufficiency and quality of the proposed supply and its desirability in comparison with the water now drawn by the town from Dug pond."

You also submitted the results of your investigations as to the character of the soil in the territory referred to in the application by means of tubular test wells, and the results of a pumping test made by connecting several of these wells and pumping from them nearly continuously with a steam pump for a period of thirteen days, from January 19 to February 1, 1898. During this test samples of water drawn from the wells, collected by you and by the Board, have been analyzed.

The source from which it is proposed to obtain the supply is the same as that referred to in your application of last year, concerning which the Board advised that the conditions appeared to be favorable, and suggested that further investigation be made in its communication of November 4. The character of the soil, as shown by the material taken from the wells, appears to be coarse and porous, but the soil taken from one of the wells driven in the bottom of the small shallow pond known as Snake pond, was quite fine.

The wells from which water was drawn were located in the immediate vicinity of Snake pond, and several other test wells were driven near the shore of the southerly basin of Lake Cochituate and one near the southerly shore of the middle basin of the lake. The average daily quantity of water pumped during the test was considerably in excess of the quantity now used for the supply of Natick but, nevertheless, the water in the ground in the vicinity of the wells, as shown by your observations, rose considerably during the test following closely a rise in the level of the water of Lake Cochituate. The tests as a whole indicate that a quantity of water much in excess of the present needs of the town of Natick can be obtained from the ground at this place under conditions similar to those which existed when the pumping test was made. The lake may, however, be drawn down much lower at times than its level at the time this test was made, and the amount of water which the ground would yield would be smaller when the level of the water in the lake is lower, and it is not feasible to tell definitely the probable quantity of water that could be obtained from the ground when the lake is drawn down near low water level; but it appears to be practicable to increase the yield of the wells, if it should become necessary, by pumping water from the lake upon the surface of the ground in their vicinity.

Analysis of several samples of the water of the test wells were collected at intervals throughout the test show that this water was clear, colorless and otherwise of good quality for the purposes of a public water supply, and if the location of the wells in soil containing organic matter beneath the small pond is avoided, and the wells for permanent use are located at a suffi-

cient distance from the lake to avoid danger of imperfectly filtered water from that source finding its way into them, there appears to be no reason to expect a deterioration in the quality of water if a quantity sufficient for the supply of Natick should be drawn continually from the ground at this place, provided the water is kept from exposure to light as is proposed in your present plan.

In view of the results of the investigation the Board is of the opinion that the source proposed by you is an appropriate one for the supply of the town of Natick, and is much more desirable than Dug pond, your present source, the capacity of which is little in excess of the present needs of the town in dry years. Moreover as stated in the previous communication of the Board, with reference to this subject, Dug pond is not a safe source from which to take water directly for domestic uses on account of the large population located along its main feeder, which discharges into the arm of the pond from which the supply for the town is drawn.

The Board would, therefore, advise that the new works be constructed with a view to supplying the town wholly from the new source, in order that the use of water from Dug pond may be abandoned as soon as practicable.

By order of the Board,

SAMUEL W. ABBOTT,

Secretary.

Note due February 1, 1909	4,800 00
	<hr/>
	\$49,500 00

SUPERINTENDENT'S REPORT.

To the Board of Water Commissioners:—

GENTLEMEN:—I herewith submit the 27th annual report of the Natick Water Department for the year ending Feb. 1, 1901:—

The works in general are in good repair. Three years ago my predecessor called your attention to the unreliable condition of the force main to reservoir, upon which no action has been taken. Knowing as I do the weakness of this pipe, I consider it necessary to lay a new cast iron pipe, not less than 16 inches in diameter, without further delay, from the corner of East Central street to reservoir.

For further information I refer you to the following tables and reports:—

EXTENSION OF MAIN PIPES, GATES AND HYDRANTS. TO JAN. 1, 1901.

Chester street,	141*	feet	6	inch	pipe	\$	99	13
Charles "	145	"	2	"	"		67	73

AUDITOR'S REPORT.

In submitting my third annual report it gives me pleasure to say that there has been a marked improvement in the condition of the various departments over that of previous years, at least in the matters pertaining to the keeping of their accounts.

In the performance of my duties I have found that the objectionable methods previously in vogue have been supplanted by thorough and systematic, though simple, methods of accounting, such as the needs of the individual departments required, and that the records as kept are creditable to the officials responsible for their safe keeping.

Notwithstanding the progress which has been made along this line, there are yet some things to be accomplished, before we can attain to the highest efficiency of service, and to this end I would recommend the adoption of some measure by which regular town employes can receive their pay for services rendered, between the close of the financial year and the annual town meeting.

Under the present system persons employed in the highway, police and other departments are obliged to wait until the middle of March for the money due them for services rendered in February. I believe that it is neither necessary nor just to compel men who are depending on their daily earnings, to wait six or seven weeks for their wages. This matter is one easy of adjustment and should be remedied without delay.

There is also much room for improvement in the matter of closing of the books promptly at the end of the financial year. Neglect to do this entails unnecessary trouble upon all concerned, and retards the publishing of the town report. It would seem as if all copy should be in the hands of the printer on or before

the tenth day of February ; this cannot be done unless the accounts are kept up and closed promptly at the time specified.

The appended table, compiled from the financial records, is a summary of the appropriations and expenditures of the several departments, and is self-explanatory, excepting the sum of \$24.81, transferred from the judgment account to the credit of the appropriation for necessary town uses. This transfer was made in accordance to the vote of the town, under article 33, at its annual meeting.

Respectfully,

FRANK ATKINSON,

Auditor.

AUDITOR'S FINANCIAL STATEMENT YEAR ENDING JANUARY 31, 1901.
